Congress Faces Himachal Freeze

PIONEER NEWS SERVICE ■
NEW DELHI

A worried Congress hurried on Wednesday to save its Government in Himachal Pradesh amid dramatic developments, including a resignation announcement by high-profile Minister Vikramaditya Singh and the suspension of 15 BJP MLAs by the Speaker. The party engaged in a damage control exercise to prevent the possible loss of a State ruled by the party just weeks ahead of the Lok Sabha elections. Congress president Mallikarjun Kharge despatched three observers — Bhupesh Baghel, Bhupinder Singh Hooda, and D K Shivakumar — to Shimla, indicating that the party could take some “tough steps”. The crisis was triggered by Tuesday’s cross-voting by six Congress MLAs in the Rajya Sabha election for the lone seat from Himachal Pradesh. The party has now sought the disqualification of these MLAs from the Assembly, and the matter was heard by Speaker Kuldeep Singh Pathania who reserved his order. The suspended BJP MLAs, including the Leader of the Opposition Jai Ram Thakur, initially refused to leave the House, apparently to stall the Assembly from passing Chief Minister Sukhvinder Singh

Himachal Pradesh Governor Shiv Pratap Shukla during a meeting with Leader of Opposition in the State Assembly Jai Ram Thakur and BJP MLAs, at Raj Bhavan, in Shimla, on Wednesday

Sukhu’s Budget through voice vote. The BJP demanded voting on the Budget, believing it would reveal that the Congress had lost its majority in the State Assembly. The House later passed the Finance Bill by voice vote with no BJP member present. The Speaker then adjourned the Session sine die. Chief Minister Sukhu dismissed speculation that he was resigning, stating, “Neither the high command, nor anyone else has asked me for resignation,” Sukhu said. Congress leader Abhishek Manu Singhvi was defeated by BJP’s Harsh Mahajan on

Tuesday through a draw of lots, after the two candidates bagged 34 votes each. The result meant that the Congress, which had come into power in the State just 14 months ago, winning 40 seats in the Assembly, had failed to reach the halfway mark. The BJP won 25 seats in the House of 68 in 2022. There are three Independent MLAs, who were believed to be with the ruling Congress until the cross-voting crisis erupted. Early morning, Leader of Opposition Jai Ram Thakur led a delegation to Raj Bhavan to meet Governor Shiv Pratap Shukla to ensure that the

Finance Bill was passed only through a division. Late in the evening, the Congress observers began their interaction with party MLAs. Congress general secretary Jai Ram Ramesh said Kharge had asked the observers and AICC in-charge for the State Rajeev Shukla to speak to all MLAs, including those who are disgruntled, and submit a comprehensive report to him soon. “The Congress will not hesitate to take tough steps as the party is our priority and will not let the people’s mandate be betrayed in

Himachal Pradesh,” Ramesh said at the AICC Press conference in the national Capital. Earlier in the morning, Himachal Pradesh Public Works Minister Vikramaditya Singh announced he was quitting the council of ministers and would submit his resignation to the chief minister and the Governor. It was not immediately clear whether he had done so. Singh, whose mother is Himachal Congress president Pratibha Singh, said, “There have been attempts to humiliate and undermine me from some quarters, and despite reservations, I supported the Government.” He is the son of Virbhadra Singh, a former Chief Minister who died in 2021. The family has in the past hinted that Virbhadra Singh’s legacy has not been honored by the party. Pratibha Singh has also expressed disgruntlement with the manner in which Sukhu has run the State. Vikramaditya Singh said the 2022 Congress campaign was run in his father’s name. “There was no poster, or hoarding or banner which did not carry his picture,” he said. But after the victory, when the matter of putting up his statue came up, the Government failed to decide the location. “It is not a political but an emotional thing for a son,” he said.

BJP in Election Mode, Selects 100 Candidates

RAJESH KUMAR ■ NEW DELHI

The BJP on Wednesday brainstormed over the party’s probable candidates in several States for the Lok Sabha elections, a day before its Central Election Committee is expected to meet to finalise the names for the first list of about 100 party nominees. The list will have names of candidates from seats in States like Uttar Pradesh, West Bengal, Maharashtra and Tamil Nadu. Sources said Home Minister Amit Shah and BJP national president JP Nadda held separate meetings with party leaders from several States, including Madhya Pradesh, Haryana, Rajasthan and Uttarakhand among others. Similar meetings with leaders from Uttar Pradesh, Chhattisgarh and Telangana have been held so far. While the lists of names in 2019 were released only after the Election Commission had announced the election schedule, it is going to be different this time as the BJP looks to follow the template seen during the latest round of Assembly polls in five States when it named its candidates, especially in the seats the party had lost five years earlier, before the announcement of dates. The first list, party sources

said, is expected to be 100 candidates which include the names of heavyweights like Prime Minister Narendra Modi, Shah, Union Ministers Rajnath Singh, Smriti Irani, Nirmala Sitharaman, S Jaishankar and Bollywood super star Akshay Kumar about whom grapevine in the party has it that he may be fielded from the prestigious New Delhi Parliamentary constituency. Other candidates from the spheres of sports and education sector are also doing the rounds and the party is completely tight lipped to reveal names being discussed as of now. Party sources also said to keep the NDA constituents in good humour

and a few minority candidates could also be fielded. Modi is the MP from Varanasi, a constituency he has won twice and is likely to contest for third consecutive time. He was elected with a huge margin of 3.37 lakh votes in 2014 and had increased it to 4.8 lakh in 2019. Amit Shah had contested the 2019 election from Gandhinagar, a seat that had been held by BJP veteran LK Advani until then. The first list for the 2019 elections had also included Modi and Shah, who was then the party’s national president and had made his Lok Sabha poll debut from Gandhinagar.

NEWS BREAK CBI summons Akhilesh

NEW DELHI: The Central Bureau of Investigation (CBI) has summoned Samajwadi Party president and former Uttar Pradesh chief minister Akhilesh Yadav as a “witness” to record his statement on Thursday in illegal mining cases registered five years ago. The cases pertain to the issuance of mining leases in alleged violation of e-tendering process.

Modi slams DMK, Congress for dynastic politics

KUMAR CHELLAPPAN ■
CHENNAI

Prime Minister Narendra Modi on Wednesday literally tore into allegations made by the DMK-led Tamil Nadu Government that the Central Government was not offering any welfare measures to the people in the State and was putting spokes on the Dravidian land’s progress. The DMK Government is blocking all welfare projects being introduced by the Central Government for Tamil Nadu. What the DMK and its alliance partners

including the Congress were doing is creating rift among the people, said the Prime Minister while addressing a mammoth rally organised by the BJP at Thoothukudi. “In the past we saw a Chief Minister struggling hard to coronate his son as Chief Minister. Now we are seeing the son working to anoint his son as the Chief Minister of the State,” said Modi without naming the late patriarch M Karunanidhi, his son and present Chief Minister M K Stalin and the latter’s son Udhayanidhi. “The DMK and the Congress have only one

Prime Minister Narendra Modi being felicitated during a public meeting in Tirunelveli, Tamil Nadu, on Wednesday

agenda and that is to perpetrate dynastic politics,” said the Prime Minister. The DMK had committed a faux pas by putting pictures of Chinese rockets in the billboards erected across the venue to make the people know that the space center coming up at Kulasekharapattinam was a project initiated by the State. “They do not know that India has mastered the design and development of high power

launch vehicles which would be launched from the new space station,” lambasted the Prime Minister. Modi listed various development and infrastructure projects implemented by the Center for the welfare of Tamil Nadu. “Five years ago, only 21 lakh people had drinking water connection at their homes in Tamil Nadu. However, this count has increased to one crore now.

Manipur commandos hold arms down stir

IMPHAL: Manipur Police commandos on Wednesday laid down their arms in protest against the abduction of Additional Superintendent Amit Kumar Moirangthem and demanded they be allowed to retaliate when attacked. The commandos of all districts put down their arms asking for action against Metei radical group Arambai Tenggol.

Two hit by train in Jharkhand

JAMTARA: At least two persons were run over and killed by a train in Jharkhand’s Jamtara district on Wednesday evening, police said. Jamtara sub-division police officer (SDPO) M Rahman told PTI that the accident took place near Kaljharia area in Jamtara district when some passengers got down from the train from the wrong side. “A local train coming on another line hit them,” he said. “Bodies of two persons have been recovered so far. Search operation is on and the toll might increase,” he said. Eastern Railway CPRO Kaushik Mitra said, “There is no incident of fire. As of now, two deaths have been confirmed. The deceased are not passengers. They were walking on the track. A 3-member JAG committee has been formed to enquire about the issue.”

Largest ever offshore drug seized

Indian Navy personnel show 3300 kgs contraband (3089 kg charas, 158 kg Methamphetamine, 25 kg Morphine) seized from a vessel in a joint operation with Narcotics Control Bureau (NCB)

PIONEER NEWS SERVICE ■
NEW DELHI

Indian security agencies have seized the largest-ever offshore consignment of drugs, weighing 3,300 kilos, and arrested five foreigners

from a dhow in the Arabian Sea off the Gujarat coast. The joint operation, codenamed ‘Sagarmanthan-1’, was carried out by the Navy, Narcotics Control Bureau (NCB), and the Gujarat Police.

The boat reportedly sailed from an Iranian port. The value of the contraband was estimated to be between ₹1,300 crore and ₹2,000 crore in the international market. Union Home Minister Amit

Shah hailed the operation as a “historic success” and a testament to his Government’s “unwavering commitment to making our nation drug-free.” “Pursuing PM Modi’s vision of a drug-free Bharat, our agencies today achieved the grand success of making the biggest offshore seizure of drugs in the nation. In a joint operation carried out by the NCB, the Navy, and the Gujarat Police, a gigantic consignment of 3,132 kg of drugs was seized. This historic success is a testament to our Government’s unwavering commitment to making our nation drug-free. “On this occasion, I congratulate the NCB, the Navy, and the Gujarat Police,” he said.

Unwavering support for Rahul Gandhi in Wayanad

KUMAR CHELLAPPAN ■ KOCHI

A vast majority in Wayanad, Kerala, wants Congress leader Rahul Gandhi to contest from the Lok Sabha constituency in the upcoming poll. In 2019, Rahul won from the constituency with an impressive margin of 4.32 lakh votes, polling 64.94 per cent of the total votes cast in the election. All his challengers were left humbled, losing their security deposits in a one-sided contest. Wayanad, situated atop the

Western Ghats, is a traditional Congress bastion, leaving no doubt about Rahul’s prospects in the upcoming election. Despite his commitments as the party’s top national leader, he has remained active in the

constituency. Interestingly, none of the voters with whom The Pioneer interacted could recall the names of the two candidates who had contested against Rahul in the 2019 polls. Even hardcore CPI (M) supporters want Rahul to run from Wayanad in this election. “The constituency gained international attention because of Rahul’s decision to contest from here. Although the constituency is yet to receive any major projects, it has faced discrimination under the CPI (M)-led Government in Kerala. Moreover, whenever there was an emergency, Rahul promptly attended to the constituency,” said Rajendran, a CPI (M) supporter.

India bears brunt of climate change wrath

ARCHANA JYOTI ■ NEW DELHI

The year 2023 brought forth a concerning reality for India, as every State and Union Territory experienced extreme weather events at least once, disrupting life, livelihoods, and the economy as resources were diverted to tackle flooding or extreme heat, volatile conditions driven by climate change. These occurrences were not sporadic; rather, they persisted for approximately 318 out of 365 days, revealing

a disturbingly recurrent pattern of climatic disruptions. In what should be considered a climate change warning to India, the toll on human life was grave, with 3,287 recorded deaths attributed to these extreme weather events. Additionally, the devastation extended to the animal kingdom, with a staggering 1.24 lakh animal deaths reported. The agricultural sector, vital for the nation’s food security, bore a heavy brunt, with 2.21

million hectares of crop area suffering damage, leading to significant economic losses. This widespread impact, detailed in the independent think tank Centre for Science and Environment’s “State of Environment 2024” report, underscores the severity of the challenges posed by climate change. The report said the climate-vulnerable country experienced extreme weather on 86 percent of days from January to September. State-wise, Himachal Pradesh emerged

File Photo

as the most heavily affected zone, enduring extreme weather conditions for 149 days, closely followed by Madhya Pradesh with 141 days. Kerala and Uttar Pradesh also faced prolonged periods of extreme weather, each recording 119 days of such events. The widespread nature of these occurrences is further underscored by the fact that eight States experienced over 100 days of extreme weather. The temperature increase

was driven by human-caused climate change and boosted by the natural El Niño weather phenomenon. The types of extreme weather varied, with heavy rains, floods, and landslides occurring on 208 days, while lightning and storms were prevalent for 202 days. Heatwaves persisted for 49 days, cold waves for 29 days, and cloudbursts were recorded on nine days, contributing to localised instances of intense precipitation.

Bhopal records highest rainfall in Feb month in 9 years

STAFF REPORTER ■ BHOPAL

State capital received the highest rainfall in the month of February after 9 years. More than half an inch, i.e., 15 mm of rain was recorded on Tuesday. Earlier in the year 2014, there was 1.9 inches i.e., 47.9 mm rainfall in the entire month. Whereas there was no rain after 2018. Accordingly, the highest rainfall was recorded in 9 years, while after 5 years the record of rainfall in February was also broken. Meteorologists said that the weather will remain changed in March. According to IMD, Bhopal, two western disturbances are becoming active on February 29 and March 1 whose effect will be seen in

Bhopal also. Therefore, the weather here will remain changed between March 28 and April 2. From February 29 cloud cover will be witnessed, chances of rainfall are less likely. With the start of the month of March there may be rain with thunder activity. There is a possibility of rain throughout the city. The weather will remain changed on this day also. Light rain may also occur in the Berasia region. On Tuesday, more than half an inch or 15 mm of rain was recorded in Bhopal. However, before this the effect of heat was seen. Due to this, the day temperature increased by 6 degrees and the mercury reached 31.8 degrees Celsius. Earlier on

Monday-Tuesday night the temperature was recorded at 16.8 degrees. In the year 2014, Bhopal received 1.9 inches i.e. 47.9 mm rainfall in the entire month of February. After this, 1 mm rainfall was recorded in 2016, 2.8 mm in 2017 and 13.3 mm in 2018. After this it did not rain. Accordingly, this time it rained on Tuesday after 5 years. At the same time, the record of highest rainfall in 9 years was also broken. 15 mm rain was recorded till 6 pm on Tuesday. At 4 pm on Tuesday evening, suddenly a storm blew at a speed of 74 km per hour for three minutes. After this the city remained busy throughout the night. 15 trees fell in the city. An old tree fell on the shed of a house in

Narayan Nagar in front of Barkatullah University. 2 electric poles fell in Palasi. A tin sheet spread on a house in Karond had flown and got stuck in a 33 KV line. Due to the storm, power supply remained disrupted in 350 colonies and localities of the city from 4 pm to 9 pm. The false ceiling in the office of the Institutional Finance Department of Vindhyaachal Bhawan collapsed. Due to this, two officers narrowly escaped. Evening flights of Air India and Indigo from Delhi could not land in Bhopal in the evening due to bad weather. Both the flights were diverted to Indore. However, both these flights could land in Bhopal with a delay of one hour each. There is a trend of cold at night, heat during the day

and rain in the capital in the month of February. If we look at the data of the last 10 years, after February 20 the day temperature reaches beyond 31 degrees. At the same time, the nights also remain cold. This time also the weather has been similar so far. The temperature remained above 30 degrees for several days. Although there has been no rain for the last five years, this time the Meteorological Department has predicted rain. According to the Meteorological Department, the temperature record has reached 1.7 degrees Celsius on the night of 11 February 1950, 74 years ago. At the same time, in the last 10 years the mercury has remained 2 to 6 degrees lower than normal.

10 Years' RI to the rape accused after 5 years

STAFF REPORTER ■ BHOPAL

The District and Sessions Court in Bhopal sentenced Veeru Valmik, accused of rape under the POCSO Act, to 10 years imprisonment on Wednesday. Special Judge Rashmi Mishra has given this decision in a 4 year old case. The accused was charged of kidnapping a minor and assaulting her sexually. The court has also sentenced the accused to a fine of Rs 5,000. In March 2019, the victim's parents had lodged a complaint at Bilkhriya police station. The family had told the police that an unknown youth had kidnapped their daughter. Investigation revealed that the girl was kidnapped by Veeru, who lives in the neighbour-hood. After the disappearance of the girl, Veeru and his family

also went missing. Two days after the incident, the police arrested the girl. Relatives become suspicious over the sudden disappearance of a neighboring family. After verification, the victim told that accused Veeru and she were good friends for 1 year. On the day of his disappearance, both of them had gone to Vidisha by bus. Both of them met at Veeru's brother-in-law's house in Vidisha. On the basis of this, the police arrested the accused Veeru under the POCSO Act. The court has punished the accused on the basis of available arguments and scientific evidence. Meanwhile police failed to track and nabbed prisoner who escaped from Bhopal's Hamidia Hospital till Wednesday who absconded from the hospital on Tuesday evening.

The negligence of the policeman deployed for security surfaced in the matter as he had gone to drink tea, leaving the prisoner alone. Kohefiza police have registered a case in the matter. The accused is being searched. According to Kohefiza police, Ghanshyam Ajay Gaur of Silwani district Raisen, was in jail in the case of attempted murder. Recently he was transferred to Bhopal jail for the treatment of hernia. He was brought to Hamidia Hospital for treatment on Tuesday. His operation was to take place here, on Tuesday evening at around 5 pm the policeman on duty Ghanshyam Panwar went to have tea. When he returned after 10 minutes, the prisoner had absconded. After which the complaint about the matter was lodged in Kohefiza police station.

STAFF REPORTER ■ BHOPAL

Today's time is considered the time of non-fiction, said Founding Chairman Santosh Chaubey at grand closing of the three-day Vanamali Katha Samman with non-fiction recital, youth composition recital and drama staging. Special sessions on composition lesson and discussion, 'Kathaan ka Rachna Vidhan' and 'Kahani ka Yuva Swar' were organized. Play based on Santosh Chaubey's story "Unke Haaye Ka Prem" and "Garib Nawaz" under the direction of senior color director Devendra Raj 'Ankur' in Natyotsav were staged. Senior litterateur Santosh Chaubey said in his statement that today's time is considered the time of non-fiction, hence non-fiction honor has also

been included in the Vanmali Samman. After this he recited an excerpt from his famous non-story 'Katha Bhopal'. The story includes the history of the formation of Bhopal, the present scenario and the vision of the future which the readers find interesting. Mamta Kalia said in her address that non-fiction has left fiction behind, there is a lot of curiosity about non-fiction

among the readers. In non-fiction, writers write about life. During his speech he mentioned senior writers like Nirmal Verma and famous books like City of Joy. In the second part of this session, writers Anil Yadav, Kabir Sanjay, Alok Ranjan gave their statements. In his statement, Kabir Sanjay said that non-fiction is becoming popular again today. Non-fiction is life and

is scattered in its various forms. Human civilization has developed only through stories. Non-fiction literature brings together science, environment and nature at the meeting point which describes the harmony of life. In this, Anil Yadav, explaining the reason for the popularity of non-fiction, said that in the last thirty years, unprecedented changes have taken place in India, especially in the Hindi belt, such that they have not happened even in the last 1000 years. Shahadat Khan, resident of western Uttar Pradesh, recited his composition 'Kurban'. In this he told the story of a goat which is reared for sacrifice. But the family becomes very attached to him. And when that goat is sacrificed, the people of the house even fall ill. Sumedha Agrashree composed and recited.

Santosh Chaubey praised the young writers and said that the three youths create stories with good descriptiveness by inventing good language with curiosity and wonder. He said hearing everyone's story and the writer should be emotional. It makes his writing better. Under the Vanmali Katha Samman Samaroh, two stories written by senior litterateur Santosh Chaubey under the direction of senior theater actor Devendra Raj Ankur in the theater festival under the Vanmali Katha Samman Samaroh, were staged by the artists of 'Sambhav' organization on Wednesday at Sharda of Rabindranath Tagore University. "Unke Khakh Ka Prem" explored half-hearted love relationships, the story "Garib Nawaz" depicted commercialism and the new socio-political conflict.

Man absconding in murderous assault case nabbed, sent to jail

STAFF REPORTER ■ BHOPAL

Shahjahanabad police arrested an absconding habitual criminal in a case of attempt to murder; accused along with his aide attacked a man on January 24. The accused Zaid Sheikh alias Zaid RTO (28) of Nariyalkheda was arrested and produced before the court and was sent under judicial custody. On January 24, the accused attacked Zuber Salmani resident of Bagh Munshi Hussain Khan and based on the complaint after preliminary investigation section 341, 294, 323, 324, 307, 34 IPC was registered against accused Zaid RTO and another unknown accused and started investigation. During the investigation, the other accused in the case, Saeed alias Shaheed Khan was arrested on February 2 and section 25 of the Arms Act. The accused is currently serving in the central jail while accused Zaid Shaikh alias Zaid RTO was absconding since the date of the incident. The accused has been booked for 12 crimes in different police stations of the state capital. On Tuesday acting on a tip off, the accused was arrested from

Nariyalkheda. Police would investigate who had helped in absconding and crimes committed during the time of absconding. Meanwhile Misrod police have arrested a vehicle lifter and seized vehicle worth Rs 90000, accused used by Zomato using the stolen vehicle and used to do recce in colonies for stealing vehicles. The accused hit another vehicle driving the stolen scooter carelessly and escaped leaving the scooter at the spot. From the accused master key, screwdriver and pliers used in the incident were seized. On February 24 the complainant reported that his brother met with an accident near Capital Mall, on verification of which, the Activa vehicle which caused the accident was found to be stolen from Purani Basti of Baghsewania on February 17. After the accident, the accused left the vehicle and fled from the spot. On the basis of technical resources and accurate information from the informer, information was received about the said accused doing delivery work in Zomato.

Pandey gets with Life Time Achievement award

Bhopal: Senior journalist and prominent social worker Keshav Pandey has been honored with the Life Time Achievement Award. This honor was presented to him at the "Atal National Award Samman Ceremony" organized under the joint aegis of HRH Shrimant Rajmata Vijayaraje Scindia Foundation and Atal Bharat Sports and Arts Association in Ujjain on Monday. The grand ceremony was organized at the Pandit Surya Narayan Vyas Auditorium of Kalidas Academy in Ujjain. Mayor Mukesh Tatwal, the Chief Guest of the ceremony awarded Atal Bhushan, the Lifetime Achievement Award to Dr. Keshav Pandey for his special contribution in the field of journalism as well as education, health, sports and art, and culture. During this event, well-known personalities of the country who have done excellent work in various fields were honored with Atal Vibhushan, Atal Alankaran and Atal Yuva Samman. South India's famous film director and actor Mukesh, RK Chowksey, Preeti Chowksey, former MLA Mahant Rajendra Bharti and founder of the organization Dilip Chandra Yadav were prominently present in the program.

Rare Disease Day celebrated at Pediatrics dept AIIMS Bhopal

STAFF REPORTER ■ BHOPAL

Rare Disease Day was celebrated by the Center of Excellence for Rare Diseases and Department of Pediatrics, AIIMS Bhopal. This year's theme is "The Zebra". On this occasion, Professor (Dr) Ajai Singh, Executive Director of AIIMS Bhopal was present as the chief guest. Expressing his views, he said that we should organize such awareness programs outside the campus, especially in colleges where future parents study and there is a greater need for such awareness. Professor Singh said that we should also include occupational therapy in the treatment of children suffering from rare diseases. We not only have to improve the lives of children but also make them self-reliant. Earlier, the presence was welcomed by Dr. Shikha Malik, Head of Pediatrics Department. He said that such programs were run throughout the month and during this period various types of competitions were also organized which included debates, poster making, slogans etc. Apart from this, children suffering

from rare diseases also presented cultural programs. Also, the parents of these children shared their experiences and said that if we trust the doctor, we will definitely be able to provide a good life to the children suffering from rare diseases. Besides, AIIMS Bhopal has witnessed remarkable achievements in various academic forums. Recently, Dr M Sangita, Dr. Divya Bhushan and Dr. Rishabh Chandela, resident from the Department of Forensic Medicine and Toxicology, AIIMS Bhopal were awarded with the Fellowship for the training of young scientists. The fellowship was awarded during the 39th Madhya Pradesh Young Scientist Congress organized by the Madhya Pradesh Council of Science and Technology (MPCST) from 21st-23rd, Feb 2024 held at Madhav Institute of Technology and Science (MITS) in Gwalior. The fellowship comes with various benefits, including a fully funded training program for young scientists, which will help to enhance research skills and knowledge.

Indore Mining Deptt seizes 9 overloaded dumpers

PNS ■ INDORE

As per the instructions of Madhya Pradesh Government and under the guidance of Indore Collector Ashish Singh continuous action is being taken by Indore District Mineral Department on illegal transportation of minerals. Indore ADM Gaurav Benal is giving

guidance to Indore Mineral Department regarding to track and check illegal transportation of Mineral in Indore district. A team led by Deputy Director flying squad mining indore Division Dharmendra Chouhan 9 dumpers were seized. On Tuesday morning. Total 9 dumpers were seized by flying squad and is kept in the

custody of Police Station Khudail. Assistant mining officer Jaideep Namdev told The Pioneer that action will be taken under the provisions of Illegal Mining Transport and Storage Rules 2022. All the 9 dumpers confiscated were overloads with Sand. Around 15 lakh rupees will be generated as government revenue in form of fine on this 9 dumpers.

Probe ordered into community building's luxurious expenses

STAFF REPORTER ■
RAIPUR

Chhattisgarh Deputy Chief Minister Arun Sao on Wednesday announced a high-level probe into the alleged irregularities in arranging luxurious facilities at a community building which was under possession of the wife of former Minister Shiv Kumar Daharia.

Sao announced this after the matter was raised by BJP legislator Rajesh Munat.

Flouting the rules the Urban Administration Department of which Daharia was Minister, money was sanctioned for luxurious items for the building of Rajshree Sadbhawana Samiti in Shatabdi Nagar, Munat alleged.

The wife of Daharia Shakun had the possession of the said building, he said.

Leader of Opposition Charan Das Mahant objected to the discussion saying the matter was with the judiciary. Meanwhile, the Deputy

Chief Minister said although a petition has been moved at the High Court, the government had taken possession of the building in which the Raipur Municipal Corporation and Smart City Project had spent around Rs 1 crore.

C'garh Assembly adjourned sine die

The Chhattisgarh Assembly was on Wednesday adjourned sine die with mutual consent of the Treasury and opposition benches.

"The budget session is aborted two days earlier after mutual consent," said

Speaker Raman Singh. He thanked Leader of the House Vishnu Deo Sai, Leader of Opposition Charan Das Mahant and Assembly Secretary Dinesh Sharma for cooperating in the smooth function of the House.

Woman Naxalite with Rs 1 lakh reward surrenders in Dantewada

STAFF REPORTER ■
DANTEWADA

A woman Naxalite carrying a reward of Rs 1 lakh on her head surrendered to security forces in Dantewada district of Chhattisgarh on

Wednesday, an official said.

Gangi Muchaki (33) turned herself in citing disappointment with the Maoist ideology, Dantewada Superintendent of Police Gaurav Rai said.

Muchaki was the Pusanna

So far, 676 Naxalites, 172 of them carrying cash rewards, have surrendered in the district since June 2020

Panchayat Krantikari Adivasi Mahila Sangathan (KAMS) president in the outlawed Maoist organisation.

So far, 676 Naxalites, 172 of them carrying cash rewards, have surrendered in the district since June 2020.

Free artificial limb measurement camp on Mar 17

STAFF REPORTER ■
RAIPUR

The Narayan Seva Sansthan is set to hold a free artificial limb measurement camp for the differently-abled persons in Raipur on March 17.

About two months later, the organization will conduct a free fitting camp.

This initiative is part of the organization's "Well of Compassion" plan.

The people will be assessed by an experienced and specialized orthotist and

prosthetic teams. They will receive meticulously crafted, lightweight and durable artificial limbs.

Established in 1985, Narayan Seva Sansthan has provided over 41,000 artificial limbs.

The camp will be held at the Jain Dadawadi premises on MG Road from 8 a.m. to 5 p.m.

Interested persons are required to bring their Aadhaar card, disability certificate and two photos displaying their disability.

Lakshman Jhula enchants devotees at Rajim Kalpa

STAFF REPORTER ■
RAJIM

The Lakshman Jhula built in the Triveni Sangam is enchanting devotees at the Rajim Kumbh Kalpa, an official communiqué said on

Wednesday.

The Jhula has been illuminated by golden lights and a painting of Ram van Gaman has been displayed with laser lights.

Around 125 officers of the Power Distribution Co are

engaged in ensuring continuous power supply to the Kalpa.

This year's Rajim Kumbh Kalpa Kalpa is being celebrated on the theme of Ramotsava. It will conclude on March 8.

Customs dispose illegal contraband of Rs 3 Cr

STAFF REPORTER ■
RAIPUR

The Customs Commissionerate has destroyed 40.86 lakh sticks of cigarettes, cigars and rolling paper valued at Rs. 3.89 crore in Raipur, an official communiqué said on Wednesday.

They were disposed of as per prescribed guidelines with the assistance of officers of Central CGST in Raipur and in the presence of independent witnesses, officers of Customs ICD, Raipur, and DRI officials.

The seized foreign origin

cigarette packets did not have a mandatory pictorial health warning in compliance with notifications issued by the Ministry of Health and Family

Welfare. The action was taken as part of a drive against illegal imports of foreign-origin cigarettes and other contraband.

PWD blacklists contractor for two years

STAFF REPORTER ■
KORBA

The Public Works Department (PWD) blacklisted contractor M.K. Gupta and Co. on Wednesday for two years due to the substandard quality of

upgradation work of the Chotiya-Chirmiri road in Chhattisgarh's Korba district.

The action was taken after the contractor failed to reply to a show cause notice issued on February 9. The department had sought a reply within 15 days.

Officials said the contractor constructed the route without complying with the quality parameters.

The department also suspended two officials and sent show cause notice to two more involved in the project on Tuesday.

STAFF REPORTER ■
DANTEWADA

The state-owned National Mineral Development Corp (NMDC) on Wednesday set up a panel to probe a mine cave-in at its Kirandul complex in Chhattisgarh.

A NMDC official said it was investigating the incident of rock formation collapse at one of its sites in Dantewada district which killed four contractual workers and injured two others. On Tuesday, the four died in the NMDC's Kirandul complex.

"NMDC is conducting a thorough investigation into the incident. In the wake of this unfortunate event, the senior management of NMDC extended its deepest condolences and support to the bereaved families," the firm said.

The two contractual workmen who were injured are being treated at the NMDC Hospital and are out of danger,

the company added. NMDC, under the ministry of steel, is the country's largest iron ore

mining entity contributing around 20 per cent of India's demand for the key steel making raw material.

Volunteers of the United Nations International Children's Emergency Fund (UNICEF) and National Service Scheme (NSS) are creating awareness for cleanliness at the Rajim Kumbh Kalpa in Rajim town in Chhattisgarh's Gariaband district.

NIBSM's role on health, food security lauded

Two-day long national conference if ICAS-NIBSM commences

STAFF REPORTER ■
RAIPUR

Padma Shri award winner Dr S. Ayyappan on Wednesday said the National Institute of Biotic Stress Management (NIBSM) plays a key role in advancing health, food security and plant health.

Ayyappan, a former Secretary of DARE and Director General of the Indian Council of Agricultural Research (ICAR), said NIBSM was the sole ICAR institute in Chhattisgarh.

He said this while speaking at a two day conference on "Novel Strategies for Mitigating Biotic and Abiotic Stresses for Agricultural and Environmental Sustainability."

Present at the venue were Prof. A.N. Mukhopadhyay, a former Vice Chancellor of AAU, Jorhat, Dr. S.N. Puri, a former Vice Chancellor of CAU, Manipur, Dr. C.D. Mayee, a former Chairman of the Agricultural Scientists Recruitment Board in New Delhi, Dr. P.K. Ghosh, Director and Vice-Chancellor

of ICAR-NIBSM, Prof. Piyush K Pandey, Vice Chancellor of Amity

Chhattisgarh, Raipur, and Dr. K Sammi Reddy from ICAR-NIBSM, Baramati.

Approximately 250 distinguished scientists, industry partners and students are attending the conference.

Dr. Puri elaborated on the origins of the institute and NIASM as deemed universities of national importance, aiming to strengthen graduate and postgraduate student capabilities.

He envisioned NIBSM as a crucial national institute in plant protection, focusing on addressing farmers' major challenges such as pest and

disease management and optimizing input usage to enhance their incomes.

Prof. Mukhopadhyay highlighted NIBSM's unique position as the world's first institute of its kind and its potential contribution to food security for India's 1.4 billion population through crop protection technologies.

With the participation of renowned scientists from India and around the world, the conference serves as a platform for discussing the latest scientific innovations in crop stress management.

Videograph LS voting process, BJP urges EC

PIONEER NEWS SERVICE ■
NEW DELHI

The BJP on Wednesday urged the Election Commission to videograph the voting process at all polling stations during the upcoming Lok Sabha elections and set up booths in complexes housing high-rise buildings.

In a memorandum, the BJP also urged the poll panel to consider reforming the

approval process for political parties' media content to make it faster, allowing them adequate time to plan their campaign.

It also requested the Election Commission to ensure there is no ambiguity in the rule pertaining to putting flags and making wall paintings by party workers at their homes during polls. "There should be clarity on this," they demanded.

A BJP delegation comprising

Union minister Ashwini Vaishnaw and party national general secretary Arun Singh met the poll panel with the demands.

"The BJP keeps making efforts to see how the entire poll process could be made more and more transparent and the voters' involvement in the elections be further increased.

Our delegation made some requests to the EC (in this regard)," Vaishnaw told

reporters after the meeting at the Election Commission. He said the BJP delegation urged the poll panel to set up booths at high-rise apartment complexes in urban areas as much as possible so that maximum eligible voters at such residential buildings could exercise their franchise. "Our second request was that video recordings be done at 100 per cent polling booths (during the elections)," Vaishnaw said.

At present, videography is done at 50 per cent polling booths only, he said, adding that 100 percent coverage of the polling booths will ensure proper documentation of everything happening there and it will increase people's faith in the country's vibrant democracy.

Over 12 lakh polling stations will be set up across the country for the upcoming Lok Sabha polls, according to the Election Commission.

Vaishnaw said the BJP delegation also made some request with regards to operational issues.

"We requested for beginning reforms in the process of granting approval to the media content of political parties.

The approval process should be made faster so that every political party gets enough time to present their views and mould their campaign," he told reporters.

BJP led NDA likely to get RS majority in April

PIONEER NEWS SERVICE ■
NEW DELHI

The ruling BJP-led National Democratic Alliance (NDA) is likely to get a majority in the Rajya Sabha in April this year once the remaining six vacancies under the nominated category are filled and those newly elected take oath. According to data available with the Rajya Sabha Secretariat, the BJP, which currently has 94 members, gained two seats in the Upper House in the just concluded elections, pushing its own strength to 96.

The strength of NDA, which at present has 113 members, will cross the half-way mark of 123 in the 245-member House in April this year once all nominated members take oath. At present, there are only six MPs who have been nominated by the President of India as members in the Rajya

Sabha, with some having joined the BJP later. There are a total of 12 nominated members in the House.

The data shows that with the support of some independents and nominated members, the NDA which did not have a majority in the Upper House so far will finally achieve the magic figure this April, helping it get crucial legislations passed in the Council of States. Elections were held on 56 Rajya Sabha seats in 15 states,

in which the BJP won 30 seats, the Congress nine, SP 2, TMC 4, YSRCP 3, RJD 2, BJD 2, and NCP, Shiv Sena, BRS, and JD(U) one seat each. With the Congress strength going down to 30 seats, the joint Opposition has less than 100 MPs in the Upper House. Having a majority in the Upper House is very crucial for the ruling dispensation as several key legislations have been stuck in the past due to lack of strength.

Nationwide free genetic testing announced

PIONEER NEWS SERVICE ■
NEW DELHI

In a groundbreaking move to tackle rare diseases, India's ICMR-National Institute for Research in Reproductive and Child Health (ICMR-NIR-RCH) on Wednesday announced free genetic testing and counselling services nationwide.

The new Genetic Research Centre (GRC) will assess clinically abnormal cases of rare paediatric diseases as well as track origins of undiagnosed genetic disorders. It also aims to facilitate timely therapeutic interventions and provide critical support for both patients and their families.

Rare diseases are typically chronic and progressive medical conditions that pose life-threatening risks to those affected. Out of the 350 million patients suffering from rare disease globally, India alone is home to approximately 72-96 million patients, according to the data Ministry of Health and

Family Welfare (MoHFW).

In India's urban areas, congenital malformations and genetic disorders are the third most common cause of mortality in newborns. With a very large population and high birth rate, and consanguineous marriage favored in many communities, the prevalence of genetic disorders is high in India. The Department of Biotechnology had launched in 2019, the UMMD initiative with an aim to establish NIDAN Kendras to provide counselling, prenatal testing and diagnosis, man-

agement, and multidisciplinary care in Government Hospitals wherein the influx of patients is more, to produce skilled clinicians in human genetics, and to undertake screening of pregnant women and newborn babies for inherited genetic diseases in hospitals at aspirational districts. Under the ICMR project, NIR-RCH centre with approval under the PCPNDT Act based in Maharashtra, plans nationwide services. Dr. Geetanjali Sachdeva, Director, highlights the trans-

formative impact on vulnerable sections of society. Dr. Shailesh Pande, Head of GRC, stresses raising awareness and enhancing testing accessibility to alleviate the societal burden of rare diseases, aligning with the national goal of universal healthcare access.

While the GRC is currently offering its services in Maharashtra, people with rare diseases from other parts of the country can avail the services, ICMR-NIRRH said.

"Strengthening access to genetic testing and counselling for rare diseases will pave the way for their early diagnosis and timely intervention, helping improve the health and well-being of some of the most vulnerable sections of society. This is a revolutionary step that can transform several lives, especially young lives in the country," said Dr. Geetanjali Sachdeva, Director, ICMR-NIRRH, in a statement. With no approved treatment for 95 per cent of rare diseases, the diagnosis of rare diseases is

challenging. While early genetic testing is key, diagnosis is conducted through a distinctive blend of clinical and laboratory methods, including cytogenetic, biochemical, and molecular approaches.

At present, the centre is providing its services to around 570 families yearly, covering genetic conditions during infancy, childhood, and adolescence, as well as for reproductive difficulties faced by couples.

"Our centre is working to address a critical public health concern. By reaching out to special schools, hospitals and the public, we are striving to raise awareness around rare diseases and enhance uptake of essential testing and counselling. In doing so, we aim to mitigate the societal burden of these diseases and realise the national goal of a healthy society, with universal access to healthcare services," said Dr. Shailesh Pande, Medical Geneticist and Head GRC, in the statement.

Law panel may propose simultaneous polls in 2029

PIONEER NEWS SERVICE ■
NEW DELHI

The Law Commission is likely to recommend adding a new chapter to the Constitution on 'one nation, one election' and holding the gigantic democratic exercise of simultaneous polls for Lok Sabha, State Assemblies and local bodies across the country by mid-2029, sources said on Wednesday.

The Commission, under Justice (ret'd) Ritu Raj Awasthi, would recommend an amendment to the Constitution to add the "new chapter or part" on simultaneous elections, the sources said.

The panel would also recommend synchronising the terms of legislative assemblies in "three phases" in the next five years so that the first simultaneous polls could be held in May-June 2029 when elections for the 19th Lok

Sabha are due.

The new chapter in the Constitution would include issues related to "simultaneous election," "sustainability of simultaneous elections" and "common electoral roll" for Lok Sabha, state legislative assemblies, panchayats and municipalities so that the three-tier simultaneous polls could be held together "in one go," they explained. The new

chapter being recommended will have power of non-extant" to override other provisions in the Constitution dealing with terms of assemblies.

The five-year period in which the terms of assemblies will be synchronised will be spread over three phases. The Commission would recommend that the first phase may deal with state assemblies

whose period will have to be curtailed by a few months -- three or six months.

In case a government falls due to no confidence or if there is a hung House, the Commission would recommend constitution of a "unity government" with representatives from various political parties. In case the unity government formula does not work, the law panel would recommend holding fresh elections for the remainder of the term of the House. "Suppose fresh elections are called for and the government still has three years, then polls should be for the remainder of the term -- three years -- to ensure sustainability," a source explained.

Besides the Law Commission, a high-level committee under former president Ram Nath Kovind is also working on a report on how simultaneous polls to

the Lok Sabha, state legislative assemblies, municipalities and panchayats can be held by tweaking the Constitution and the existing legal framework. Along with the upcoming Lok Sabha polls, expected in April-May this year, elections for at least five assemblies are likely to take place, while state polls for Maharashtra, Haryana and Jharkhand are expected later this year.

Bihar and Delhi are scheduled for assembly polls next year, while Assam, West Bengal, Tamil Nadu, Puducherry and Kerala are scheduled for 2026, and Uttar Pradesh, Uttarakhand, Punjab and Manipur in 2027. As many as nine states may have assembly polls scheduled for 2028 -- Tripura, Meghalaya, Nagaland, Karnataka, Mizoram, Chhattisgarh, Madhya Pradesh, Rajasthan and Telangana.

India, Germany to cooperate on high technology for military use

PIONEER NEWS SERVICE ■
NEW DELHI

India and Germany have resolved to closely collaborate on high-technology for military use in line with a broader aim to develop defence cooperation as a key pillar of the bilateral strategic partnership.

Besides this issue, ways to further bolster strategic cooperation figured prominently at a meeting of the India-Germany high defence committee that was held in Berlin on Tuesday, defence ministry said here on Wednesday.

Giving details, officials said both the countries are set to carry out joint military exercises in the Indo-Pacific, in reflection of their growing defence ties.

The Indian delegation at the talks was headed by Defence

Secretary Giridhar Aramane while the German side was led by State Secretary at German defence ministry Benedikt Zimmer.

"Both sides discussed a range of bilateral security and defence issues, with a focus on developing defence cooperation as a key pillar of the strategic partnership between India and Germany," the defence ministry said.

"They exchanged views on the

regional security situation, discussed likely joint exercises with Germany in the Indo-Pacific, and deliberated on potential defence industrial projects and proposals.

It said both sides emphasised on the need for a closer defence partnership and connecting the defence industries from both sides together.

"Of particular focus was the collaboration in high technology in defence," the ministry said in a statement. The high defence committee meeting follows the visit of German Federal Minister of Defence Boris Pistorius to India last year.

Aramane also interacted with prominent think tank German Institute of International and Security Affairs (Stiftung Wissenschaft und Politik) in Berlin.

Authorities to comply with guidelines on not requisitioning forest staff for election duty: NGT

PIONEER NEWS SERVICE ■
NEW DELHI

The National Green Tribunal (NGT) has observed that it expects the authorities to comply with instructions regarding not requisitioning forest officers or vehicles for election duty during the Lok Sabha polls.

The green panel was hearing a plea seeking directions to all states and Union Territories for implementing the instructions issued by the Election Commission of India, exempting territorial staff of the Forest department and forest vehicles from being requisitioned in the elections. Noting the government-issued documents, a bench of National Green Tribunal Chairperson Justice Prakash Shrivastava said, "We find that the circulars in regards to the relief claimed have already been issued by the competent authorities and, unless something contrary exists, these circulars need to be complied with by the concerned authorities."

The bench, also comprising Expert Member A Senthil Vel, underlined that the tribunal's jurisdiction is limited to civil cases raising a substantial question about environmental issues and those for implementing the National Green Tribunal's scheduled acts. The National Green Tribunal Act provides jurisdiction to

the body over several acts, including the Water (Prevention and Control of Pollution) Act, Water (Prevention and Control of Pollution) Cess Act, Forest (Conservation) Act, Air (Prevention and Control of Pollution) Act, Environment (Protection) Act, Public Liability Insurance Act, and the Biological Diversity Act. "Since requisite instructions and guidelines have already been issued and concerned authorities are expected to comply with the same while ensuring the smooth holding of the election..." the tribunal said in an order passed on Tuesday.

"Hence, we are of the view that, at this stage, no further direction by the tribunal is required," it added.

The plea, filed by advocate Gaurav Bansal, underlined that a shortage of manpower could destroy the "precious natural resources" of forests. The Election Commission of

India had issued circulars dated February 8 and June 7 last year that exempted certain categories of vehicles, including forest vehicles, and some categories of personnel, including senior forest officials and territorial staff of the Forest department, from being requisitioned for election duty, respectively, the tribunal noted.

It also noted a circular of the Central Empowered Committee dated February 2 that requested all chief secretaries not to requisition for election duty vehicles of wildlife sanctuaries, national sanctuaries and national games parks. Additionally, a communication was issued by the Uttarakhand government the following day, exempting from the Lok Sabha elections duty Forest department vehicles allotted in various circles and personnel posted at the field level because of forest fires, the bench noted.

Heed WHO warning, Mothers against vaping group urges nations to act

PIONEER NEWS SERVICE ■
NEW DELHI

Mothers Against Vaping, a coalition of proactive and concerned mothers, has issued a call to action for South-East Asian nations to heed the World Health Organization's (WHO) warning regarding the rising use of new-age gateway devices like e-cigarettes and vapes, especially among children and youth.

This collective effort aims to combat what they describe as the "escalating vaping crisis" affecting young people. The WHO's caution against the proliferation of vaping in the region underscores the urgent need to control the spread of e-cigarettes and similar products. Notably, India has taken a proactive stance by enacting the PECA 2019 legislation, which bans all aspects of electronic cigarette products, including production, manufacturing, import, export, transport, sale, distribution, storage, and advertisement, deeming them illegal within the country.

Dr. Rajesh Gupta, additional director of Pulmonology and Critical Care at Fortis Healthcare, emphasized that claiming e-cigarettes can eliminate nicotine addiction is scientifically inaccurate, given their nicotine content. Furthermore, the use of e-cigarettes can deliver higher doses of nicotine and other

harmful chemicals, posing additional risks to users, especially young people. Dr. Bhavna Barmi, a Clinical Psychologist and Founder of Happiness Studio, highlights the mental health impacts associated with vaping, including mood and anxiety disorders, suicidal thoughts, and depressive symptoms. Mothers Against Vaping also drew attention to a survey conducted by the American Heart Association, presented in February 2023.

The findings of the survey revealed a concerning correlation between vaping nicotine and THC (tetrahydrocannabinol), the psychoactive component in marijuana and self-reported symptoms of depression and anxiety.

"The long-term consequences of e-cigarettes remain unknown, but studies have already demonstrated serious lung injuries and adverse health effects associated with

their use. Without effective control measures, the widespread prevalence of these new-age devices poses a genuine risk, potentially leaving our future generation with lasting health impairments.

"From causing chemical poisoning in users to jeopardising maternal and foetal health, vaping presents a myriad of physical health risks," said Dr Varuna Pathak, former Professor of Gynaecology and Obstetrics, Gandhi Medical College. According to a new study, vapors are susceptible to infection by SARS-CoV-2, the virus that spreads COVID-19 and continues to infect people around the world. The researchers from University of California, Riverside said the liquid used in electronic cigarettes, called e-liquid, typically contains nicotine, propylene glycol, vegetable glycerin, and flavor chemicals.

India, Nepal foreign secretaries hold talks, review bilateral ties

PIONEER NEWS SERVICE ■
NEW DELHI

Foreign Secretary Vinay Kwatra and his Nepalese counterpart Sewa Lamsal on Wednesday reviewed various key aspects of India-Nepal bilateral ties.

Lamsal is in India in his first foreign visit after assuming charge as Nepal's foreign secretary recently.

"The two foreign secretaries held discussions on the entire range of multifaceted cooperation between India and Nepal and also followed up on the seventh-India-Nepal joint commission meeting," the Ministry of External Affairs (MEA) said. The joint commission meeting was co-chaired by the External Affairs Minister S Jaishankar and his Nepalese counterpart N P Saud in Kathmandu last month. "The visit is in keeping with the tradition of regular high-level exchanges

between the two countries and the priority India attaches to its relations with Nepal under its 'Neighbourhood First' policy, and provides an opportunity to further advance our bilateral ties," the MEA said on Lamsal's visit. Foreign Secretary Lamsal is visiting India to participate in the eighth Asia Economic Dialogue being jointly convened by the MEA and Pune International Centre on Thursday in Pune. Nepal is important for India in the context of its overall strategic interests in the region, and the leaders of the two countries have often noted the age-old "Roti Beti" relationship.

The country shares a border of over 1,850 km with five Indian states -- Sikkim, West Bengal, Bihar, Uttar Pradesh and Uttarakhand. Landlocked Nepal relies heavily on India for the transportation of goods and services.

Rajnath lauds Modi, highlights defence exports rise

PTI ■ SITAMARHI (BIHAR)

Defence Minister Rajnath Singh on Wednesday claimed that the country's military exports rose by more than 20 years in the last five years, which was proof of India's "self-reliance" under Prime Minister Narendra Modi's leadership. Addressing a gathering of local intelligentsia in north Bihar's Sitamarhi town, Singh said defence exports were worth "about Rs 1,000 crore, when I took over, and it has soared to worth over Rs 20 lakh crore". "Our total defence manufacture stands at a monumental one lakh crore. Try figuring it out by scribbling the number, in digits, on a piece of paper. This shows India is becoming self-reliant (atma nirbhar) and leaders across the world acknowledge that 21st century shall belong to India", said the Defence minister, who was on a day-long trip of Bihar. The former BJP president asserted that his party was characterised by "no difference between words and deeds", and disclosed "I had been entrusted

with preparing the manifesto for elections in 2014 and again five years later. On both occasions, Narendra Modi had insisted that we do not make any promise that we could not fulfil". Singh said abrogation of Article 370, scrapping of triple talaq and construction of Ram temple at Ayodhya showed "we always walk the talk (Jo kahte hain Kar ke dikhate hain)". Going down the memory lane, he recalled having gone to jail at the height of the Ayodhya movement in 1990s "when, I headed the BJP's youth wing".

The Union minister also highlighted "India's jump from the 11th spot to the fifth" in terms of the size of the economy and expressed confidence "We will be among the top three in the world soon and by 2047 we shall be a developed economy". He also credited the prime minister's intervention for the recent release from Qatar of former Indian Navy officials whom a court in the West Asian country had awarded death sentence. He also recalled Russia and Ukraine "halting their war for

a few hours, upon Modi's request, to facilitate return of our students" a year ago. "In contrast, governments formed by the Congress in the past were known for empty promises of eradicating poverty and corruption scandals that saw even Union ministers landing in jail", said the senior BJP leader. Singh, who is on a day-long tour of Bihar, had earlier paid obeisance at the nearby Punaura Dham, a shrine situated at the spot where Goddess Sita is believed to have been discovered by King Janaka. "The way Prime Minister Narendra Modi's credibility has been rising, there will be no area left where the lotus would not bloom", Singh had told reporters on the occasion. He was also asked whether the lotus would bloom "for the first time" in Sitamarhi, a Lok Sabha seat the BJP has never seen. He replied "With the blessings of Mother Janaki, the lotus would bloom in Sitamarhi, too", but hastened to add, with a ghost of smile on his lips, saying "there is a pond nearby

with lots of lotuses. So there is no problem". Notably, the party has not fielded its own candidate in Sitamarhi after the 1998 Lok Sabha polls, leaving it for allies like Chief Minister Nitish Kumar's JD(U) or, in 2014 when he fought separately, for the now defunct RLSP. The JD(U) had won the seat in 2019, when it fielded Sunil Kumar Pintu, a BJP man who chipped in after the official candidate of the Chief Minister's party returned his ticket. It is being understood that the JD(U) wants to contest the seat again and Nitish Kumar, who is now the party president, has assured state legislative council Chairman Devesh Chandra Thakur that he will be the candidate this time. This has met with resentment from Pintu while the BJP has been maintaining a studied silence over the issue. The Union minister declined to take questions on development of Sitamarhi, which is not a patch on Ayodhya in terms of infrastructure, despite being a part of the "Ramayana Circuit".

Mizoram adopts resolution against India, Myanmar border fencing

PTI ■ AIZAWL

The Mizoram Assembly on Wednesday adopted a resolution opposing the Centre's decision to fence the India-Myanmar border and scrap the Free Movement Regime (FMR) with the neighbouring country. The resolution, moved by Home Minister K Sapdanga, urged the Centre to reconsider its decision. It urged the Union government to instead take steps to ensure that Zo ethnic people, "who have been divided in different countries, are unified under one administrative unit". While moving the resolution, Sapdanga said the Zo ethnic people, who have inhabited Mizoram and the Chin hills of Myanmar for centuries and once lived together under their own administration, have been geographically divided when the British occupied the region. He said the British demarcated the India-Myanmar border and divided the Zo ethnic people's land into two countries. "The Zo ethnic people can't accept the India-Myanmar border, which has been imposed on them by the British. They have been dreaming of reunification under one administrative unit someday," the home minister said. He said fencing the India-Myanmar border or scrapping the FMR, which will mandate the approval of the imposed boundary, is unacceptable for the Zo ethnic people. Although the Mizoram government is yet to receive official intimation about the Centre's plan, it is evident from media reports and statements of Union ministers that the Centre is planning to fence the India-Myanmar border and suspend the existing FMR with

Myanmar, he said. Union Home Minister Amit Shah had on February 6 announced that the entire India-Myanmar border would be fenced. Two days later, on February 8, he said that the Centre has decided to scrap the India-Myanmar Free Movement Regime (FMR) to maintain the country's internal security and demographic structure of the northeastern states. Sapdanga alleged that the recent decisions were motivated mainly by the demands of the Manipur government. The idea of fencing the India-Myanmar border and lifting the FMR, as reported in a section of media, stemmed out of some reasons, including national security, smuggling of contraband items, illegal immigration and movement of insurgents, he said. Sapdanga said national security "can't be an excuse" for fencing the India-Myanmar border and lifting the FMR. "If the Centre is so concerned about national security, it should also fence all the international borders that the country shares with neighbouring countries," he said. It should also abolish the mechanism India has with Nepal and Bhutan, under which people of these

countries can visit each other's territory without a visa, he said. He said that even during the peak period of insurgency in the northeastern states, the FMR with Myanmar was never questioned. He said that fencing the international border and lifting the FMR will severely affect people living along the border on either side. "I urge the Centre to consider the hardships that will be faced by the Zo ethnic people if the India-Myanmar border is fenced and the FMR is scrapped," Sapdanga said. After a prolonged discussion, the assembly unanimously adopted the resolution. Chief Minister Lalduhoma and Leader of the Opposition, Lalchhandama Ralte of the Mizo National Front (MNF), were present. Four Indian states — Mizoram, Manipur, Nagaland and Arunachal Pradesh — share a 1,643-km-long international border with Myanmar. Mizoram shares a 510-km-long border with Myanmar's Chin state and the Mizos share ethnic ties with the Chin people. Mizoram's civil society organisations and student bodies also strongly opposed the Centre's decision to fence the border and lift the FMR.

Had health issues: BJP MLA who skipped RS polls voting

PTI ■ KARWAR (KARNATAKA)

BJP MLA Arabail Shivaram Hebbar on Wednesday cited health issues as the grounds for abstaining from voting in the Rajya Sabha elections. He said there was no link between his abstention and his disgruntlement with the district unit of the party. The Yellapur MLA did not turn up for the voting despite a party whip, while Yeshwanthpur MLA S T Somashekhar voted in favour of Congress in the name of "conscience", during the polls to four seats of Rajya Sabha from Karnataka on Tuesday, in an embarrassment to the BJP. Somashekhar on Wednesday participated in the Assembly session, and was seen in his designated seat on the opposition side, among other BJP MLAs. Both Somashekhar and Hebbar were earlier in the Congress. They were among 17 Congress-JD(S) legislators, who had quit from their parties, which ultimately led to the collapse of H D Kumaraswamy-led coalition government in July, 2019. They had subsequently won the bypolls on BJP ticket and served as Ministers in the previous saffron party government.

"My health was not good in the morning (on Tuesday), I had planned to go (for voting), on Doctor's advice after 6 PM I had to come back, for this reason I could not vote. Nothing else. I could have gone for voting and could have done cross voting or could have come without voting for anyone," Hebbar said in response to a question. Speaking to reporters here, he said, he was not a person who would abstain from voting out of any fear, and has been in politics for four decades. "I was told by my personal assistant the whip was issued to me after 1 PM (on Tuesday). When the whip should be issued, how...Law will take its course," he further said. Hebbar said, there was no "relationship" between him abstaining from voting and his unhappiness with the party, and there are forums to express disgruntlement. Asked whether he was giving any warning to the party by abstaining, he said, "I have not given any warning, I had some (health) issues, so could not go." Hebbar said: "my disgruntlement is only at the district level. I have no disgruntlement at the state or national level. I have said this earlier too, I am saying it again now".

Tipra Motha team in Delhi for MHA meeting

PTI ■ AGARTALA

A three-member delegation of Tipra Motha, led by its chief Pradyot Kishore Manikya Debbarma, arrived in New Delhi on Wednesday evening to attend a meeting called by the Union Ministry of Home Affairs (MHA), a senior leader of the party said. Tripura Chief Minister Manik Saha and his Assam counterpart Himanta Biswa Sarma, who are currently camping in the nation-

al capital, are expected to attend the MHA meeting, Tipra Motha leader Animesh Debbarma said. Earlier in the day, leaders of Tripura's main opposition party launched a fast-unto-death at Hatai Katar in West Tripura district demanding a constitutional solution to the issue of Tiprasa people. Animesh Debbarma said Pradyot Kishore Manikya Debbarma, party president BK Hrangkhawli, and ex-MLA Rajeswar Debbarma are slated to attend the meeting, the agen-

da of which has not been revealed. "Our movement is continuing at Hatai Katar seeking a permanent constitutional solution to the problem of Tiprasa people. The party is determined to find a solution to the vexed problem", he said. "There has been no law and order problem at Hatai Katar. Adequate security personnel have been deployed in the area as a preventive measure", said AIG (Law & Order) Jyotishman Das Chowdhury.

Assam Congress working president Goswami resigns, likely to join BJP

PTI ■ GUWAHATI

Assam Congress working president Rana Goswami resigned from the party on Wednesday and headed to New Delhi where he is likely to join the BJP. Goswami had on Sunday resigned as the party's organisational in-charge of Upper Assam citing "various political reasons". "I beg to state that I am tendering my resignation as the working President of Assam Pradesh Congress Committee and as an active

member of Indian National Congress," he said in the resignation letter addressed to Congress general secretary (organisation) KC Venugopal. Soon after resigning, he went to New Delhi where he is likely to meet BJP president JP Nadda in the presence of Chief Minister Himanta Biswa Sarma, sources in the state's ruling party said. Leader of opposition Debabrata Saikia of the Congress told reporters that Goswami has not given any reason for quitting the party.

"He has not given any reason for quitting the party. If it is given, we can analyse and take suitable action to rectify the situation," Saikia said. "The party had some inkling about Goswami's decision as he was absent from several political programmes, but he should have discussed his grievances with the Congress state president," he added. Saikia said Goswami's resignation would affect the Congress. "I will not deny it, but we will continue with our efforts to strengthen the party," he said.

Shinde Government distributing funds to BJP, Shiv Sena only: MLC

PTI ■ MUMBAI

Shiv Sena (UBT) legislator Anil Parab on Wednesday alleged in the Maharashtra legislative council that the state government was distributing funds meant for development works to the lawmakers of the BJP and ruling Shiv Sena only, and said it was an "injustice" to common people. He made the allegation in the House citing a detailed response availed under the

Right to Information (RTI) Act. "I have detailed information obtained under the RTI Act, which states that development funds are disbursed to the legislators belonging to either BJP or Shiv Sena. Even BMC commissioner (I S Chahal) told me that he cannot release funds without the chief minister's approval. Why do you have to stoop low in the name of development work? People are suffering due to it,"

Parab said. He also asked the government to clarify under what provisions the guardian ministers of Mumbai city and

Mumbai suburban district can dictate the Brihanmumbai Municipal Corporation (BMC) to release and utilise its funds. "The BMC is an independent body," the leader of the Uddhav Thackeray-led Sena said. Road construction tenders are flawed, he alleged, and claimed that releasing funds early to the contractors would now result in more chaotic roads as the work will stretch for a long period. "The BMC has guidelines for construction of

cement roads. However, the Eknath Shinde government ignored it completely and proceeded to issue the work orders rampantly," he added. "Construction of roads is going on, but it will not be completed in time as the civic body imposed a fine on contractors after we complained to the BMC administration. There is no information available whether the fine was paid. In many cases, the work is not moving ahead," he said.

Arunachal Governor receives voter card

PTI ■ ITANAGAR

Arunachal Pradesh Governor At Gen (Retd) KT Parnaik on Wednesday received his Elector's Photo Identity Card (EPIC) from State election officials here. After receiving the card, the governor said voting is a fundamental right which must be exercised by all responsible citizens. "It is a way to safeguard people's rights and freedom by ensuring that everyone has a voice in the political process," he said. Parnaik said voting is the cornerstone of democracy and it is essential for ensuring that governments are accountable, responsive, and reflective of the will of the people. "It is a way for citizens to have a say in shaping the laws and regulations that govern society. Moreover, it is a way for people to feel connected to their communities and have a sense of ownership over the decisions that affect their lives," he added.

Stalin inaugurates infra projects in Tamil Nadu

PTI ■ CHENNAI

Tamil Nadu Chief Minister MK Stalin on Tuesday inaugurated several infrastructure projects and also felicitated a couple who prevented a train accident in the state's Tenkasi district. Stalin inaugurated electricity infrastructure projects established jointly by the Tamil Nadu Transmission Corporation Limited and the Tamil Nadu Generation and Distribution Corporation Limited at a cost of Rs 7,305.49 crore. He also threw open office buildings and quarters for revenue divisional officers and tehsildars and office buildings for revenue inspectors and village administrative officers, built at a cost of Rs 12.27 crore. A pedestrian subway constructed by the Chennai Metro Rail Limited under the Central Square Project at a cost of Rs 9.75 crore was also

inaugurated through videoconferencing. The chief minister later felicitated farm workers Vadumgaiah and his wife Vadukithiammal who ran on railway tracks and prevented an express train from colliding into a truck that had rolled over from and fallen on the track at Puliur village on February 25. He presented them with a

cheque for Rs 5 lakh as a token of appreciation for risking their lives in averting a major accident. The chief minister also provided a Startup Innovation Grant of Rs 50,000 and a commendation certificate to twins Raman and Lakshmanan of Backyard Creators, dedicated to affordable healthcare solutions.

Trader loses ₹3.61 crore in cyber fraud; one held

PTI ■ MUMBAI

A garment unit owner has been arrested after a 73-year-old businessman from Mumbai fell prey to an online investment fraud and ended up losing Rs 3.61 crore, police said on Wednesday. The Cyber Police have so far frozen an amount of Rs 2.20 crore and 330 bank accounts, an official said. The alleged transactions took place between May 20 and October 7 last year after the businessman was contacted by three persons, including two women, online who lured him into investing in a scheme by promising hefty returns, the official said. "They also created a WhatsApp group, made an online agreement with the businessman, and sent it to his email ID. The agreement mentioning the returns on the investments was shared in the group to gain the trust of the businessman," he said.

The victim invested Rs 3.61 crore. As he didn't get any returns on his investment, he approached the West Region Cyber Police Station in Bandra Kurla Complex (BKC) and lodged a complaint. The name of the garment unit owner, Ketab Ali Kabil Biswas, came to the fore during the investigation and he was arrested on charges of cheating and forgery under the Indian Penal Code and the Information Technology Act on Monday. "During the investigation, the cyber police froze Rs 2.20 crore which had been diverted into two bank accounts. Prima facie, as many as 330 bank accounts used by fraudsters have also been frozen," the official added.

Jagan disburses ₹1,294 crore under YSR Rythu Bharosa PM Kisan scheme

PTI ■ AMARAVATI

Andhra Pradesh Chief Minister Y S Jagan Mohan Reddy on Wednesday disbursed Rs 1,294 crore under YSR Rythu Bharosa - PM Kisan scheme for the fifth year, including interest subvention for the fourth year under YSR Sunna Vaddi Panta Runalu scheme. Out of Rs 1,294 crore, Rs 1,078 crore funds have been disbursed to more than 53 lakh farmers at the rate of Rs 2,000, while Rs 216 crore will go in the form of interest subvention for timely repayment of interest on crop loans taken during Rabi-2021 and Kharif-2022 seasons to 11 lakh farmers. "State welfare depends on farmers' welfare and keeping that in mind, the government has taken several steps for the welfare of farmers in the last 57 months," said Reddy, in a virtual address to officials and

beneficiaries from his camp office. According to the CM, the YSRCP government paid Rs 67,500 to each farmer under the Rythu Bharosa scheme in the past 57 months, which is Rs 17,500 more than the Rs 50,000 promised in five years. The state government has been implementing various welfare schemes with commitment for the benefit of farmers and hand holding them at every step, unlike the previous TDP regime that ditched the

farming community by defaulting on the Rs. 87,612 crore loan waiver promise, he said. Until now, Reddy said, Rs 34,288 crore has been disbursed under YSR Rythu Bharosa - PM Kisan and Rs 2,050 crore via YSR Sunna Vaddi Panta Runalu schemes, benefiting 85 lakh farmers. He highlighted that both the schemes are helpful to small and marginal farmers by meeting 80 percent of their cultivation expenses.

Dropshipping: The human touch in a digital era

With its low-risk, high-reward approach, dropshipping offers a gateway to success, empowering ventures to thrive in the competitive arena

As technology has become more accessible to billions of individuals, the e-commerce sector has emerged as a dominating force in today's complex and global marketplace. According to Mordor Intelligence, India's e-commerce market size is expected to skyrocket to \$299.01 billion by 2029, with a CAGR of 21.50%, and is estimated to be \$112.93 billion in 2024. While it might seem easy to others, the truth is that succeeding in e-commerce requires significant effort. This is where to establish a trustworthy reputation in today's competitive era, dropshipping has emerged as a viable option for entrepreneurs and small businesses. **The importance of Dropshipping:** Dropshipping has revolutionised the e-commerce landscape, providing an entry point for entrepreneurs and small businesses with low investment and risk. Unlike traditional retail models that necessitate inventory and logistics management, dropshipping enables businesses to collaborate with reliable suppliers, allowing them to focus on marketing and customer service, ultimately creating a unique brand identity that appeals to their target audience. Furthermore, this personal touch in the digital age sets them apart from their competitors and helps establish trust and loyalty among customers. As online shopping continues to grow, dropshipping will become a critical tool for staying competitive in the ever-changing e-commerce market. Plus, according to IMARC, the global dropshipping market is expected to reach \$1,787.4 billion by 2032, with a growth rate (CAGR) of 23.46% from 2024-2032. **How to craft a unique brand identity with dropshipping:** In an era where having a unique brand identity is imperative, dropshipping offers a convenient and cost-effective way to achieve this. With dropshipping, companies can customise their brand image and choose unique products to appeal to particular clientele groups. Through dependable supplier partnerships and efficient marketing techniques, entrepreneurs can also establish a distinctive brand identity that appeals to their intended market. This uniqueness helps firms stand out from the competition in the digital era and draws in customers while also encouraging brand loyalty. **Empowering businesses to succeed!** While dropshipping uses technology and automation to streamline operations, it is ultimately the human touch that sets businesses apart in the digital age. Thus, by embracing the human touch and prioritising meaningful interactions, small businesses and entrepreneurs can differentiate themselves in a crowded marketplace and build a loyal customer base that transcends transactions. Furthermore, when businesses dropship and focus their operations, a plethora of opportunities arise that empower them to succeed in today's ever-evolving era. In conclusion, as technology continues to democratise commerce, the e-commerce sector thrives, with India's market poised for exponential growth. Amidst this landscape, dropshipping emerges as a vital strategy for entrepreneurs and small businesses to navigate the competitive realm. By leveraging reliable suppliers and focusing on branding, dropshipping facilitates unique market positioning, crucial for sustained success. As the global dropshipping market burgeons, embracing this model empowers businesses to craft distinctive identities, fostering customer loyalty and longevity. Ultimately, while technology drives efficiency, it's the human touch that propels businesses forward, ensuring relevance and resilience in the dynamic e-commerce sphere. *(The writer is prominent player in the Indian eCommerce industry and domain expert of dropshipping; views are personal)*

PARAS THAKKAR

36

AMERICANS TEND TO VOTE FOR THE PARTY THAT BEST SERVES THEIR ECONOMIC INTERESTS. HISTORICALLY, THEY HAVE TENDED TO SUPPORT THE GOVERNING PARTY DURING GOOD TIMES, WHILE IN BAD TIMES, THEY PREFER THE OPPOSITION

LETTERS TO THE EDITOR

DIDI'S HOLLOW SLOGAN

Sir — The horrific events that have unfolded in Sandeshkhali have paid to Mamata Didi's vaunted slogan of Maa, Mati, and Manush. The political slogan coined by Mamata herself has turned out to be a grim joke on the state's people. Murder, Mayhem, and Molestation have usurped Maa, Mati, and Manush, going by the horror stories coming out of Sandeshkhali. The deliberate misreading of the Calcutta HC stay order on the formation of an SIT and CM Mamata Banerjee's stock response to the horrific incidents at Sandeshkhali - outsiders and BJP/ RSS people are involved - leaves nobody in doubt that the main accused, Shahjahan Sheikh, enjoys the protection and patronage of Didi. Now that the HC has rapped the West Bengal government on the knuckles, it has promised to arrest Sheikh within a week. This sudden volte-face indicates that Sheikh is within earshot. Didi has now no option left but to arrest Sandeshkhali's bête noire and her party's henchman, Shahjahan Sheikh. Here's hoping Didi will show some spine. **Avinash Godbole | Dewas**

SPENT FORCE

Sir — In the never-ending battle between the police and the Maoists, either in Chhattisgarh or Jharkhand, the former has almost decimated the latter. The latest was the killing of three Maoists in the Koyalibeda forest area of the Kanker district in Chhattisgarh on Sunday. Significantly, Home Minister Amit Shah in a series of posts on X on Friday had said that the Centre's holistic approach, contributing to health and educational upliftment in the tribal areas dominated by the naxals, resulted in curbing naxalism to a great extent. Familiarity with the surroundings and rapport with the locals have acted as weapons for the police. Intelligence gathering has been a Maoist forte; the police have succeeded in beating the opponents at their own

Poverty on decline

Niti Aayog has recently made an important claim about poverty in the country citing the Consumer Expenditure Survey. Poverty in the country has been reduced by five per cent. Just read the news that the National Sample Survey Office conducted the survey. For this, about one lakh seven thousand families in urban areas and one lakh fifty-five thousand families in rural areas were selected. Along with this reduction in poverty, per capita monthly expenditure has doubled compared to 2011-2012. It has been mentioned in the report that the per capita monthly expenditure in the urban section is 6459 rupees and the expenditure in the rural section is 3773 rupees. People in both urban and rural areas have achieved economic progress. Due to this, the race for development is going on. Compared to 2011-2012, the gap has reduced now. It has now come to 71 per cent from 84 per cent. Especially in the year 2004, this difference was almost 91 per cent. There have been changes in lifestyle in both these areas. As the purchasing power of both regions increases, they seem to be spending more on milk, fruits, and vegetables. Overall, this survey has brought out a big issue regarding the reduction of poverty. This is the result of the economic progress that has been going on under the leadership of Prime Minister Modi in the last ten years. **Shantaram Wagh | Pune**

game. Counselling the local tribals against giving in to the Maoist demands figures right on top of the agenda. Over the years, many Naxals have given up their violent ways, and the credit should go to the concerted effort of the security forces. A combination of a humanitarian touch and taking the fight into the Maoist camps has paid rich dividends. According to Home Ministry data, in the last nine years, there has been a significant decline in left-wing extremism-related violence and deaths. Fatalities among both security forces and civilians have drastically reduced, by 72 and 68 per cent respectively, and these are exceptional numbers that we can see and it shows a positive figure. **Ganapathi Bhat | Akola**

CRUELTY ON ANIMALS

Sir — The circus, often seen as a place of amusement and wonder, hides a darker truth behind its colourful curtains. Behind the spectacle, lies a world of suffering, as animals endure brutal training methods including deprivation and beatings, to perform unnatural tricks. Tigers forced to jump through fiery hoops and elephants forced to balance on small platforms are emblematic of this exploitation. The mental and physical well-being of the animal worsens as a result of this wrongdoing. Many suffer from injuries while others endure psychological distress from social deprivation and incarceration. Despite increased cognisance, the circus industry continues to prioritise profit over animal welfare. It's time to acknowledge the pain and suffering foisted upon circus animals in the name of entertainment. By boycotting animal-centric circuses and supporting cruelty-free entertainment, we can help end the exploitation of circus animals and create a world where laughter does not come at the expense of sentient beings. **Tanisha Gupta | Ujjain**

BUILDING BRIDGES WITH EMPATHY

SWAPNA MAJUMDAR

It is incumbent upon us to ensure that every student receives vital lessons in empathy

After being constantly taunted for her height, skin colour and academic performance by her fellow students for months, a 12-year-old girl cut her wrists in an attempt to end her mental agony. Fortunately, she was saved. But a 16-year-old student of Class 10, who jumped off the top floor of the apartment building he was living in, did not survive. It was his letter to his mother in which he wrote that the school had killed him, that revealed the shocking details of bullying he was subjected to and the school's failure to stop it. While several steps have been taken to put an end to bullying, penal action can only be a temporary deterrent and not a long-term solution especially in the present milieu of hyped social media, freely available toxic content and, peer pressure.

If children are taught to engage empathetically, can it inculcate feelings of respect, dignity and compassion for all? Project Empathy, an endeavour to bring empathy education into school curricula, believes being empathetic can nurture emotionally and mentally strong human beings. When young students understand the importance of living in harmony with one another, the 'walls of division' between them transform into 'walls of friendship'. Contrary to popular belief, empathy can be taught. While 50% of our empathic capacities are genetically inherited, research shows that the rest can be learnt. This is the biggest reason why empathy must be taught at a young age. Over the last five years, Project Empathy led by educationist Vibha Lakhera, introduced this concept and developed activities and stories that acknowledge, recognize and identify emotions and broaden the discussion around emotional health and well-being of every student.

Empathy education helps to enrich the emotional vocabulary of students and build their emotional and mental resilience. Introduced in about six schools mainly army schools like the Army Rifles Public Schools in North India and Kashmir and Alok Bharati Public School in Delhi, the project has been able to reach out to over 1500 students. Importantly, teachers, who lay the foundation for their values, have been recognized as critical to the success of teaching empathy.

This resource book for teachers draws from the education system and best practices in schools in Denmark and Finland, two countries among the top three happiest countries in the world according to the United National Happiness Report. Put together by Lakhera and veteran development journalist Usha Rai, the interesting manual explains the neuroscience of empathy with the help of psychologists and brain scientists sans any jargon. The mirror neurons, which light up when a person feels an emotion like sadness or joy, respond in the same way when this person sees another person also demonstrating the same kind of feelings or actions. This empathic reaction helps to understand and share experiences.

The manual also explains the types of empathy-cognitive, emotional and compassionate while differentiating between sympathy and empathy. Stories centred on children and their emotions have been innovatively used to provide practical guidelines on how to diffuse tensions, reduce stress, and strengthen understanding of each other's differences. At present, empathy is not included in teacher training programmes. Only a handful of schools have taken the initiative to introduce the concept of empathy education. There is a need to encourage all students to consider different perspectives and viewpoints. Only by being empathetic, can they understand and acknowledge differences of opinion and resolve conflict situations.

Nawaz Sharif's strategic move or military script?

KS TOMAR

Nawaz's decision to step aside from the race for premiership in Pakistan and nominate his brother Shehbaz instead has sparked intense debate

Alively and geo-political issue is being debated worldwide, especially in Pakistan which pertains to the 'mysterious' decision of three-time prime minister, Nawaz Sharif to Suo moto opt out of the race for premiership and subsequently nominate his younger brother, Shehbaz Sharif for the top slot though he was a favourite of powerful military, obviously current army chief, Asim Munir, who had scripted the entire episode to enthrone him.

Foreign policy experts say that it was on the analogy of former PM, Imran Khan who was saddled in the chair due to the open patronage of Ex-Army chief, Qamar Javed Bajwa but both fell apart owing to fighting for supremacy. It was a paradox and a typical case of a "servant" challenging the authority of the "Master" which may happen in this dispensation also but Nawaz as a "shadow PM" may not permit it as he has had the bitter experience of being ousted by the army from the post in 2018.

Analysts are convinced that owing to compelling circumstances, Ex PM, Nawaz played his cards well hence the choice fell on his brother which will also ensure the continuity of "Family Rule" in Pakistan. Yet, another addition will be Maryam Nawaz who is poised to become chief minister of the most important province of Punjab.

2nd, the army had meticulously planned to keep Imran Khan out of the political process hence more than 150 cases were registered against him by the previous regime and courts handed him the punishment in three cases which exceeded 24 years.

3rd, due to Imran's tirade against the army, Nawaz was brought to Pakistan last year from self-exile in London which preceded the Supreme Court's decision in 2018 to sentence him to ten -years imprisonment and a fine of \$10.6 million in a corruption case related to Panama papers of illegal properties abroad. He was disqualified and hence fled to London to fight his battle.

Nawaz's brother Shahbaz headed the government in Pakistan which ensured the adoption of a bill in parliament on June 25, 2023, which limited the lifetime disqualification of lawmakers to 5 years.

It was meant to pave the way for the return of his elder brother to resume his political activities in Pakistan.4th, Nawaz's critics allege that the stage was set for "mass scale rigging" to help him to become PM but the game plan went haywire as independents supported by Imran from jail won a majority of the seats and Nawaz's party PML-N could not get even simple majority which shattered the dream of Nawaz who was averse to heading a minority government.

5th, Nawaz nominated Shehbaz because he had experience in heading coalition governments and was a flexible politician who could take partners along .6th, Nawaz would have found it difficult in parliament as Imran's loyalists were ready with a lot of ammunition to put him on the mat on corruption whereas Shehbaz is better placed so far. Finally, Nawaz and the army chief are on the same page which may help the new government to appease the sentiments and fulfil the aspirations of the people who are facing the problem of survival.

It will be the most difficult task of the Shehbaz government to implement the harsh preconditions of IMF which had released USD 710 million second tranche of a USD 3 billion loan to the cash-strapped country to stabilize its debt-ridden economy. Shehbaz's previous government had successfully negotiated with the IMF to procure the "bailout Package" which needs to be clinched. The IMF had saved Pakistan from economic collapse as Pakistan's reserves stood at \$7.8 billion as of Nov. 18, 2023, barely enough to cover imports for a month.

The people are reeling under inflation which has touched to the level of 30% and prices of essential commodities are beyond the capacity of consumers. The floods had caused losses of billions and thousands of lives were lost hence the new PM will have to take care of rehabilitation tasks which are in disarray.

The floods had caused tremendous losses of USD 3.3. trillion in June-October,2022 besides killing 1839 people which must be uppermost in the priorities of the new government as victims are still craving relief and rehabilitation tasks which seem to be in disarray.

China has treaded cautiously and did not touch the sensitive issue of rigging whereas the United States and EU demanded an investigation into the allegations. China has come to the rescue of Pakistan several times but the cost has been beyond the imagination of this poor country. China's debt policy has entrapped Pakistan which has procured a heavy loan and the Chinese investment has risen \$65 billion in China-Pakistan Economic Corridor (CPEC) by 2022. China has already acquired control of Gwadar Port on 16 May 2013 which may be retained instead of a lease guarantee in future.

Originally valued at \$46 billion, the value of China Pakistan Economic Corridor had been worth \$62 billion as of 2020. India and the US are opposed to BRI hence Nawaz will have to tread cautiously to keep China in check to save his country from the debt trap policy.

China will be looking for the security protection of its projects in Pakistan hence it may develop cordial relations with the Shehbaz government. Experts say that the United States wanted to see the back of Imran who had accused it of conspiring with the army to oust him from power. It has got history of having direct ties with army generals hence it may find it easy to deal with the new government. India can expect Nawaz to influence Shehbaz to take the initiative to start dialogue with India which has already created its space in the world arena and economic ties can help the beleaguered people of this poor country.

The new coalition government is bound to be weak hence delivery expectations on domestic and international fronts must be based on logical conclusions and limitations of new dispensation in Pakistan.

A roadmap for comprehensive socio-economic inclusion

The interim Budget for 2024 emerges as a crucial instrument for steering the nation towards inclusive development

As is the case with multiple developing economies across the world, India is faced with wealth inequality, unemployment, existing and persisting gaps in healthcare infrastructure and delivery, and environmental concerns. The Global Multidimensional Poverty Index based on data from 2021/22 finds that 16.4 % of India's population lives in poverty with 4.2% facing severe poverty.

The Regional Human Development Report 2024 by UNDP finds that the top 10% of the population controls 65% of the nation's total wealth, underlining stark wealth inequality. The consequences are multi-dimensional – it negatively impacts upward intergenerational mobility and lowers the rate of economic growth.

Lack of jobs has been an area of concern for the country for decades now. While the current unemployment rate for January 2024 is 6.8, unemployment amongst educated youth is concerning. The State of Working India 2023 by Azim Premji University reveals that over 42% of India's graduates under 25 were unemployed in 2021-22.

NAGHMA MULLA

lowers the rate of economic growth.

Lack of jobs has been an area of concern for the country for decades now. While the current unemployment rate for January 2024 is 6.8, unemployment amongst educated youth is concerning. The State of Working India 2023 by Azim Premji University reveals that over 42% of India's graduates under 25 were unemployed in 2021-22.

Marked by a distinct urban-rural divide, gaps in healthcare services and infrastructure are a major obstacle for people in small towns and rural areas. A large part of India's population suffers from inaccessibility to quality healthcare – leading to delayed treatments and high out-of-pocket expenditure.

A United Nations report emphasises that approximately 75% of healthcare infrastructure, medical personnel, and other health resources are predominantly located in urban regions, home to merely 27% of the overall population. The impact of climate change and disasters on both people and the economy has been devastating. India experienced uninsured losses of \$32.94 billion from natural disasters between 2018 and 2022. The ramifications of human loss are even more grave and are evident in the 55.9 million displacements from 237 disasters mapped between 2018 – 2022. The interim budget addresses these issues in a big way.

It presents a comprehensive roadmap for national progress, meticulously designed to touch upon critical facets of development such as women empowerment, job creation, environmental conservation, and poverty alleviation. It aims to address the needs and aspirations of diverse social groups—'Garib' (the poor), 'Mahilayen' (women), 'Yuva' (youth), and 'Annadata' (farmers). This inclusion is notable as it envisages the significance of marginalised social groups in achieving a Viksit Bharat – a developed India by 2047 – marking a century of India's independence.

The budget prioritises support for the 'Micro, Small, and Medium Enterprises' (MSME) sector with necessary finances, technologies, and training to enhance global competitiveness. The rooftop solarization policy is set to offer employment and entrepreneurial opportunities in technical and supply sectors.

Additionally, the establishment of a separate Department for Fisheries and the expansion of the Pradhan Mantri Matsya Sampada Yojana (PMMSY) underscore efforts to double production and exports in the fisheries sector, aiming to create 55 lakh new jobs and drive inclusive economic progress. A significant step is the focus on provisions for the inclusion of low-income groups and women. Initiatives like the disbursement of 30 crore Mudra Yojana loans to women entrepreneurs and financial support to 78 lakh street vendors under PM-SVANidhi emphasise the government's focus on enhancing work-force participation and providing earning avenues that drive upward mobility.

The SHG model of development has also proved to be successful – enabling nearly 10 million women to achieve annual incomes of over INR 1 lakh. Capitalising on this success, the goal has been expanded to elevate the target from 2 crore to 3 crore 'lakhpati didis', showcasing a commitment to women's economic empowerment. The budget made notable health sector announcements. The focus on preventive healthcare through the provision of cervical cancer vaccinations for young girls and the integration of various maternal and child health schemes indicate a push towards addressing the specific health needs of vulnerable groups.

The expansion of the Ayushman Bharat scheme to extend healthcare benefits to approximately 1.5 million ASHA workers and Anganwadi workers acknowledges the crucial contribution of these frontline health workers to primary healthcare services. Leverage existing hospital structures for the establishment of more medical colleges, addresses both – the healthcare professional shortage and the surging demand for medical education. This builds on the initiative from April 2023, when the government approved the establishment of 157 nursing colleges, allocating INR 1,570 crore, with the central government contributing INR 1,016 crore. The budget also provides a concrete pathway to achieving a net-zero economy by 2070. Key measures include funding for offshore wind energy, coal gasification projects to lessen reliance on fossil fuels, support for the electric vehicle ecosystem, and incentives for bio-mass collection. The budget also promotes bio-manufacturing for eco-friendly materials and climate resilience in the blue economy.

Trump defeats Nikki in Michigan primary

Biden wins Democratic primary

PTI ■ WASHINGTON

Voters handed decisive victories to US President Joe Biden and his predecessor Donald Trump in their respective parties' presidential primaries in Michigan on Tuesday, increasing the chances of a 2020 rematch between the two leaders in the race for the White House on Tuesday.

Trump easily defeated his main rival, Indian-American Nikki Haley, winning yet another early contest and additional delegates - bringing him one step closer to being able to formally secure the Republican Party's nomination in November.

When the last reports came in, Haley had received 26.5 per cent of the votes as against Trump's massive 68.2 per cent. US media outlets projected

that 77-year-old Trump would sweep the Michigan primary with more than 40 per cent of the votes against 52-year-old Haley. Trump's win further shuts the door on former South Carolina Governor Haley's hopes of building momentum ahead of next week's Super Tuesday contests, when more than one-third of the Republican Party's delegates are at stake.

Trump has previously won the Iowa caucuses, New Hampshire primary, caucuses in Nevada and the U.S. Virgin

Islands, and South Carolina primary. He needs 1,215 delegates to formally secure the nomination.

Trump reached the Michigan Republican Watch Party Tuesday night shortly after the race was called in his favour.

"I just want to thank everybody. This was a great day," he said, pointing to the state's autoworkers, saying Democrats "destroyed the autowork business," but vowed to "bring it all back into Michigan" if elected.

"I can tell you this

November cannot come fast enough," Trump said. "We have the worst president in history—the most incompetent and the most corrupt president, and we can't let this continue," Trump said, attacking his Democratic Party rival.

"So that day, November 5th, and January 20th is when we take over," Trump said, referring to Election Day and Inauguration Day. "We're going to make America great again, greater than ever before," Trump said, amidst applause from his supporters.

Trump has won 119 delegates while Haley has just 22. To receive the Republican Party's presidential nomination, one should get the backing of 1,215 delegates.

Meanwhile, Biden, 81, coasted to another victory in the state, marking his fourth primary victory in four tries. He has won 177 delegates from the four victories. Biden, who does not have any known rivals, has to win 1,968 delegates to get the Democratic Party's nomination.

Reacting to his victory, Biden said, "I want to thank

every Michigander who made their voice heard today. Exercising the right to vote and participating in our democracy is what makes America great.

"Four years ago, it was Michigan's diverse coalition that came together to reject Donald Trump's MAGA (Make America Great Again) extremism and sent me and Kamala to the White House," he said in a statement.

"For all of this progress, there is so much left to do. Donald Trump is threatening to drag us even further into the past as he pursues revenge and retribution," Biden said.

Meanwhile, the results in Michigan further solidified the positions of Trump and Biden as frontrunners in their respective parties.

Republicans will formally name their presidential candidate during a national convention in July. Democrats will have their convention in August.

However, a key feature of the Democratic primary in Michigan, which has a significant Muslim population, as

around 13.25 per cent of Biden's Democratic voters cast ballots for the "uncommitted" as part of their protest against the president for his handling of the Israel-Palestine war.

Strong opposition to Biden's support for Israel's war in Gaza against Hamas militants led some Democrats to call for voters to select "uncommitted" instead of casting a vote for the incumbent president.

Supporters of the effort for "uncommitted" ballots in Michigan said they were hoping for 10,000 such votes, a level that was easily surpassed. With nearly 99 per cent of the ballots counted, there were already more than one lakh "uncommitted" votes.

The movement picked up the support of Rep. Rashida Tlaib, who announced her public opposition to supporting Biden ahead of her home state's primary. "I was proud today to walk in and pull a Democratic ballot and vote uncommitted. We must protect our democracy. We must make sure that our government is about us, about the people," Tlaib said in a video.

Turkish drones kill three in Syria

Beirut(AP): Turkish drone strikes in northeastern Syria on Wednesday killed at least three members of a local Christian force and wounded others, including civilians, a Kurdish official and a Syrian opposition war monitor said. Also on Wednesday, in the southern Syrian city of Sweida, security forces opened fire at protesters angry over the country's worsening economy as they tried to break into the offices of President Bashar Assad's ruling Baath Party. A 52-year-old man was shot in the chest and later died of his wounds.

There was no immediate comment from Ankara on Wednesday's airstrikes. Turkey has been attacking Kurdish fighters in Syria for years but attacks on the fighters from the country's Christian minority have been rare.

The force that was targeted, the local Christian Syriac police known as Sutoro, works under the US-backed and Kurdish-led Autonomous Administration

of North and East Syria.

Siamand Ali of the US-backed Syrian Democratic Forces told The Associated Press that the Turkish drones initially hit three Sutoro vehicles near the northeastern town of Malikiyah. When a fourth vehicle, a pick-up truck, arrived at the scene to retrieve the casualties from the strike, it also came under attack, he said.

The Britain-based Syrian Observatory for Human Rights, an opposition war monitor, said three Sutoro police members were killed, as well as one civilian. The Observatory said the attack was the latest of 65 such strikes so far this year in northeastern Syria that have killed 18 people, mostly Kurdish fighters. Turkey often launches strikes against targets in Syria and Iraq it believes to be affiliated with the

Kurdistan Workers' Party or PKK — a banned Kurdish separatist group that has waged an insurgency against Turkey since the 1980s.

Israel-Hamas war: No imminent deal despite Biden's Gaza ceasefire signal

AP ■ JERUSALEM

Israel and Hamas on Tuesday played down chances of an imminent breakthrough in talks for a cease-fire in Gaza, after US President Joe Biden said Israel has agreed to pause its offensive during the Muslim holy month of Ramadan if a deal is reached to release some hostages. The president's remarks came on the eve of the Michigan primary, where he faces pressure from the state's large Arab American population over his staunch support for Israel's offensive. Biden said he had been briefed on the status of talks by his national security adviser, Jake Sullivan, but said his comments reflected his optimism for a deal, not that all the remaining hurdles had been overcome.

In the wake of Hamas' Oct. 7 attack on southern Israel, Israel's air, sea and ground campaign in Gaza has killed tens of thousands of people, obliterated large swaths of

the urban landscape and displaced 80% of the battered enclave's population.

Israel's seal on the territory, which allows in only a trickle of food and other aid, has sparked alarm that a famine could be imminent, according to the United Nations.

With UN truck deliveries of aid hampered by the lack of safe corridors, Egypt, Jordan, the United Arab Emirates, Qatar and France conducted an airdrop of food, medical supplies and other aid into Gaza on Tuesday. At a beach in southern Gaza, boxes of supplies dropped from military aircraft drifted down on parachutes as thousands of Palestinians ran along the sand to retrieve them.

But alarm is growing over worsening hunger among Gaza's 2.3 million Palestinians.

Two infants died from dehydration and malnutrition at Kamal Adwan Hospital in Gaza City, said the spokesman

for Gaza's Health Ministry, Ashraf al-Qidra. He warned that infant mortality threatens to surge.

Dehydration and malnutrition will kill thousands of children and pregnant women in the Gaza Strip," he said.

The UN Population Fund said the Al Helal Al Emirati maternity hospital in Gaza's southernmost town of Rafah reported that newborns were dying because mothers were unable to get prenatal or postnatal care. Premature births are also rising, forcing staff to put four or five newborns in a single incubator.

Most of them do not survive, it said, without giving figures on the numbers of deaths. Now the prospect of an invasion of Rafah has prompted global alarm over the fate of around 1.4 million civilians trapped there. Talks to pause the fighting have gained momentum recently and were underway Tuesday. Negotiators from the United States, Egypt

and Qatar have been working to broker a cease-fire that would see Hamas free some of the dozens of hostages it holds in exchange for the release of Palestinian prisoners, a six-week halt in fighting and an increase in aid deliveries to Gaza.

The start of Ramadan, which is expected to be around March 10, is seen as an unofficial deadline for a deal. The month is a time of heightened religious observance and dawn-to-dusk fasting for hundreds of millions of Muslims around the world. Israeli-Palestinian tensions have flared in the past during the holy month.

"Ramadan's coming up, and there has been an agreement by the Israelis that they would not engage in activities during Ramadan as well, in order to give us time to get all the hostages out," Biden said in an appearance on NBC's "Late Night With Seth Meyers" that was recorded Monday.

Houthi rebels suspected in new rocket attack off Yemen coast

AP ■ DUBAI

A rocket exploded late Tuesday night off the side of a ship travelling through the Red Sea off the coast of Yemen, authorities said, the latest suspected attack to be carried out by Yemen's Houthi rebels. The attack comes as the Houthis continue a series of assaults at sea over Israel's war on Hamas in the Gaza Strip and as the US and its allies launch airstrikes trying to stop them.

The British military's United Kingdom Maritime Trade Operations centre, which oversees shipping in the Mideast, reported the attack happened about 110 kilometres off the coast of the Houthi-held port city of Hodeida. The rocket exploded several miles off the bow of the vessel, it said.

"The crew and vessel are reported to be safe and are proceeding to next port of call," the UKMTO said.

The private security firm Ambrey reported that the ves-

sel targeted appeared to be a Marshall Islands-flagged, Greek-owned bulk carrier in the area at the time. Another ship, a Panama-flagged, Emirati-owned chemical tanker was nearby as well, Ambrey said.

The Associated Press could not immediately identify the vessels involved.

The Houthis typically take several hours to claim their assaults and have not yet done so for the assault late Tuesday.

Meanwhile, the US military's Central Command said an American and an allied warship shot down five Houthi bomb-carrying drones in the Red Sea on Tuesday night.

The drones originated "from Houthi-controlled areas of Yemen and (it was) determined they presented an imminent threat to merchant vessels and to the US Navy and coalition ships in the region," Central Command said in a statement.

Since November, the rebels

have repeatedly targeted ships in the Red Sea and surrounding waters over the Israel-Hamas war. Those vessels have included at least one with cargo for Iran, the Houthis' main benefactor, and an aid ship later bound for Houthi-controlled territory.

Despite over a month of US-led airstrikes, Houthi rebels remain capable of launching significant attacks. Last week, they severely damaged a ship in a crucial strait and downed an American drone worth tens of millions of dollars. The Houthis insist their attacks will continue until Israel stops its combat operations in the Gaza Strip, which have enraged the wider Arab world and seen the Houthis gain international recognition.

The Houthis, a Zaydi Shiite group, seized Yemen's capital in 2014 and have battled a Saudi-led coalition since 2015. Their Zaydi people ran a 1,000-year kingdom in Yemen up until 1962.

Wildfires scorch Texas Panhandle and briefly shut down nukes facility

AP ■ CANADIAN

A series of wildfires swept across the Texas Panhandle early Wednesday, prompting evacuations, cutting off power to thousands, and forcing the brief shutdown of a nuclear weapons facility as strong winds, dry grass and unseasonably warm temperatures fed the blazes. Republican Gov. Greg Abbott issued a disaster declaration for 60 counties as the main blaze, the Smokehouse Creek Fire, swelled into the second-largest wildfire in the state's history.

The main facility that disassembles America's nuclear arsenal paused operations Tuesday night but said it was open for normal work on Wednesday.

Authorities have not said what might have caused the blaze, which tore through sparsely populated counties set amid vast, high plains punctuated by cattle ranches and oil rigs. In Borger, a community of about

Wildland Team members depart to operate amid the spread of fire.

Agencies

13,000 in Hutchinson County, Adrianna Hill said she and her family were terrified as fire encircled the entire town until the winds shifted. "It was like a ring of fire around Borger, there was no way out... all four main roads were closed," Hill, 28, said. The flames came within about 1 mile (1.6 kilometers) of the home she shares with her husband and 20-month-old son. "What saved

our butts was that northern wind ... it blew it the opposite direction," Hill said. "We were scared, but every night I pray ... and that's all I can do." The weather forecast provided some hope for firefighters — cooler temperatures, less wind and possibly rain on Thursday. But for now, the situation was dire in some areas.

The Smokehouse Creek Fire in Hutchinson County burned

UK stepping up lawmakers' security as tensions flare over Israel-Hamas war

AP ■ LONDON

The British government said on Wednesday that it is stepping up security for lawmakers after politicians reported threats and intimidation connected to the Israel-Hamas war. The Home Office said a 31 million-pound (USD 40 million) fund will give every lawmaker a "dedicated named police contact" and provide money for those facing threats to pay for private security protection.

The government said some of the money will go more broadly to protecting Britain's "democratic processes from intimidation, disruption or subversion" ahead of a general election later this year. The fund includes money for extra police patrols in areas where tensions are high.

Divisions over the conflict in Gaza have convulsed British politics, with some lawmakers saying they fear for their safety after receiving threats over their positions on the war. Reports of both antisemitic and anti-Muslim abuse in Britain have soared since Hamas' October 7 attack on Israel, which triggered Israel's invasion of Gaza.

A debate last week in the House of Commons on whether to call for a cease-fire descended into chaos amid allegations the speaker of the house had bent parliamentary rules in response to pressure from pro-Palestinian activists.

Conservative lawmaker Mike Freer has announced he is stepping down because of abuse and death threats linked to his support for Israel. Freer said an arson attack on his office in December was the "final straw". He said the money announced on Wednesday was only "dealing with the symptom" rather than "going to the root cause" of why people feel emboldened to attack politicians. "Security is welcome," Freer told Times Radio. "But frankly, unless you get to the root cause, then you're just going to have a ring of steel around MPs. And our whole style of democracy changes." British lawmakers have a tradition of meeting regularly with constituents in

their local communities, but security has been tightened after several attacks in the last decade. In 2016, Labour lawmaker Jo Cox was killed by a far-right extremist, and Conservative David Amess was murdered in 2021 by an attacker inspired by the Islamic State group.

In 2017 an Islamic State-inspired extremist killed four people with a vehicle on Westminster Bridge before stabbing a police officer to death at the gates of Parliament. Two years later, in 2019, a neo-Nazi pleaded guilty to plotting to kill a Labour lawmaker. Anti-war activists claimed the government was trying to stifle protest and lumping peaceful demonstrators in with violent extremists.

Home Secretary James Cleverly called on pro-Palestinian demonstrators to halt the mass protests that have drawn hundreds of thousands of people to central London almost weekly to call for a cease-fire in a conflict that has killed close to 30,000 Palestinians, according to the Gaza health ministry in the Hamas-run territory.

Israel says Hamas killed 1,200 Israelis, mostly civilians, and abducted roughly 250, in the October 7 attack. The protests have been overwhelmingly peaceful, though there have been dozens of arrests over signs and chants allegedly supporting Hamas, a banned organization in Britain. Jewish organisations and many lawmakers say the mass marches have created an intimidating atmosphere for Jewish Londoners — though members of the Jewish community have been among those on pro-cessa-fire marches. "I genuinely don't know what these regular protests are seeking to achieve," Cleverly told the Times of London.

"They have made their position clear, we recognise that there are many people in the UK that hold that position. We respect that, but the UK government's position is a disagreement with that for very practical, well thought-out reasons".

Prince Harry loses legal challenge over security level in UK

London (PTI): Prince Harry on Wednesday lost a legal challenge against the British government over the level of his security protection when he is in the UK, with a High Court judge in London ruling that the decision to remove police protection was not "unlawful or irrational".

The 39-year-old, younger son of King Charles III, who relocated with his family to the US after stepping back as a frontline royal, had argued that he was treated wrongly in the government's decision to change the level of his UK taxpayer-funded personal security. His lawyers told the court that it was "unlawful and unfair" to take such an approach to his protection while he is in his home country. However, Judge Sir Peter Lane ruled that the decision to remove police protection was not "unlawful or irrational". "Even if such procedural unfairness occurred, the court would in any event be prevented from granting the claimant [Prince Harry — the Duke of Sussex] relief," said Lane. "This is because, leaving aside any such unlawfulness, it is highly likely that the outcome for the claimant would not have been substantially different," he said. The bulk of the court proceedings were held in private because of the confidential nature of evidence over security measures. The case goes back to February 2020, following a decision by the Executive Committee for the Protection of Royalty and Public Figures (RAVEC) — delegated by the UK Home Office on security — to review the senior royal's security profile. The UK government had told the court the case should be dismissed because RAVEC was entitled to conclude that Prince Harry's protection should be "bespoke" and considered on a "case-by-case" basis given his lack of full-time royal duties in the country.

South Korean, US troops to begin major exercises next week

AP ■ SEOUL

South Korean and US troops will begin their expanded annual military drills next week in response to North Korea's evolving nuclear threats, the two countries said on Wednesday, a move that will likely enrage North Korea because it views its rivals' joint training as an invasion rehearsal.

In recent months, North Korea has inflamed animosities on the Korean Peninsula with fiery rhetoric and continued missile tests. While it's unlikely for North Korea to launch full-blown attacks against South Korea and the US, observers say the North could still stage limited provocations along the tense

border with South Korea. On Wednesday, the South Korea and US militaries jointly announced that the allies will conduct the Freedom Shield exercise, a computer-simulated command post training, and a variety of separate field training, from March 4-14.

Col. Lee, Sung-Jun, a spokesperson for South Korea's Joint Chiefs of Staff, said that the allies' drills are designed to bolster their joint capabilities to prevent North Korea from using its nuclear weapons. He said the allies are to carry out 48 field exercises this spring, twice the number conducted last year, and that this year's drills would involve air assault, live-firing and bombing

training. "Our military is ready to punish North Korea immediately, strongly and to the end in the event of its provocation, and we'll further strengthen our firm readiness through the upcoming drills," Lee said.

North Korea didn't immediately respond to the drills' announcement. North Korea has reacted to previous major South Korea-US military drills with its own missile tests.

North Korea has sharply intensified its weapons testing activities since 2022 in part of its efforts to expand its nuclear and missile arsenals. This year, the North already conducted six rounds of missile tests — five of them

reportedly involving cruise missiles — and other weapons launches. Experts say North Korea believes a bigger weapons arsenal would allow it to pressure the US and South Korea more effectively to make concessions like sanctions relief when diplomacy resumes. They expect North Korea to ramp up its testing activities and other provocations this year as both the US and South Korea head into major elections. South Korea and the US have responded to the North's testing spree with expansions of their bilateral military drills and trilateral exercises involving Japan. US and South Korean officials have repeatedly warned that any nuclear attack by North

Bharti Enterprises chief Sunil Bharti Mittal knighted by King Charles III

PTI ■ LONDON

Bharti Enterprises Founder and Chairman Sunil Bharti Mittal on Wednesday became the first Indian citizen to be conferred an honorary Knighthood by Britain's King Charles III "for services to UK and India business relations". In a list of honorary British awards unveiled by the UK Cabinet Office, Mittal receives a KBE under the Most Excellent Order of the British Empire — one of the highest honours conferred by a British monarch.

The 66-year-old entrepreneur said in a statement that he was "deeply humbled" by the gracious recognition from King Charles.

"The UK and India have historical relations, which are

now entering a new era of increased cooperation and collaboration. I remain committed to working towards strengthening the economic and bilateral trade relationships between our two great nations," Mittal said. "I am thankful to the government of the UK, whose support and keen attention to the needs of business has been critical in making the country an attractive investment destination," he said. The KBE, conferred for a pre-eminent contribution in any field of activity, is awarded in an honorary capacity to foreign nationals. While the Knighthood conferred on UK nationals gives them the title of Sir or Dame, non-UK nationals awarded the honour add KBE (or DBE for women) after

their name.Previous Indian recipients of the Honorary KBE include Ratan Tata (2009), Ravi Shankar (2001) and Jamshed Irani (1997), conferred by the late Queen Elizabeth II. The investiture ceremony will be conducted by the British High Commissioner to India at a later date, when he will formally hand over the royal insignia to Mittal.The honour recognises Bharti Enterprises' work within the India-UK space, including with the UK government in the field of satellites. Sunil Bharti Mittal led the revival of OneWeb (now Eutelsat), leading a consortium with the UK government and other strategic investors to offer satellite broadband services globally, a company statement notes.

New Pak govt’s first priority is to fix economy: Nawaz Sharif

AP ■ ISLAMABAD/LAHORE

Pakistan’s former prime minister Nawaz Sharif on Wednesday said the priority of the upcoming government led by his party will be to “fix” the ailing economy as all the problems plaguing the cash-strapped nation were linked to the economic woes.

“The government will try to fix the economy which would in turn fix everything,” Sharif, the supreme leader of the Pakistan Muslim League-Nawaz (PML-N) told the media after arriving at the Parliament House for the first time since the February 8 elections.

Sharif, who surprisingly nominated his younger brother Shehbaz Sharif to be the prime minister of a coalition government, also said that he wishes every National Assembly, Senate and Prime Minister to complete their constitutional term.

No prime minister in coup-prone Pakistan has completed his/her five-year term. Sharif became prime minister thrice but was removed on all three occasions in mid-term.

Earlier, he was welcomed by prime minister candidate Shehbaz Sharif and other members of his party upon his arrival at the National Assembly for the PML-N’s parliamentary meeting. The meeting, chaired by party supremo Nawaz Sharif, will mull over the PML-N’s strategy about matters about the NA’s inaugural session slated for tomorrow, Geo News reported. Pakistan has avoided potential default with the help of international donors and friendly countries but its economy is still under clouds. It is believed that another IMF program would be needed after the ongoing package.

The country’s economy has been in a free fall mode for the last many years, bringing untold pressure on the poor masses in the form of unchecked inflation, making it almost impossible for a vast number of people to make both ends meet.

NAWAZ NOMINATES

SHEHBAZ FOR PM’S POST

The parliamentary party of the PML-N headed by three-time former Pakistan premier Nawaz Sharif on Wednesday formally nominated his younger brother Shehbaz Sharif for the post of prime minister to head a coalition government. The parliamentary members’ meeting of the Pakistan Muslim League-Nawaz (PML-N) was held in Islamabad with party supremo Nawaz Sharif, 74, in the chair.

Shehbaz, 72, had led a coalition government for 16 months till August 2023 before the caretaker government took over following the announcement of general elections.

“Nawaz officially nominated his younger brother Shehbaz Sharif and party loyalist Sardar Ayaz Sadiq for the posts of prime minister and speaker of the National Assembly. The parliamentary party endorsed Shehbaz’s name and also reposed its full confidence in the leadership of Nawaz,” PML-N central deputy secretary Attaullah Tarar said in a statement after the meeting. The nomination of Shehbaz Sharif as the next prime minister by the elder brother, who himself was eyeing the plum post for a record fourth time, had surprised many within and outside the party. Outgoing National Assembly Speaker Raja Pervaiz Ashraf has called the National Assembly session on Thursday after President Dr Arif Alvi, known for his closeness to jailed former prime minister Imran Khan and his Pakistan Tehreek-e-Insaf (PTI), refused to do so.

The President is of the

view that Parliament is not complete because the Election Com-m-ission of Pakistan (ECP) is yet to clear the air over the allocation of reserved seats to the Sunni Ittehad Council (SIC), following the PTI-SIC ‘merger’ for this very purpose.

Khan’s PTI-backed independents have emerged as the largest number of winners followed by PML-N and PPP. However, Khan has alleged that the February 8 elections were the most controversial and rigged polls in the country’s history.

He has accused the PML-N-Pakistan Peoples Party post-poll alliance, which also has four other parties, as “mandate thieves” set to form the government in the Centre.

The PML-N has the full backing of the military establishment to form the government both in the Centre and Punjab province.

As per the Constitution, a party must win 133 out of 265 contested seats in the 266-member National Assembly to form a government. Independent candidates – a majority backed by 71-year-old Khan’s PTI party – won 93 National Assembly seats. The PML-N won 75 seats while the PPP came third with 54 seats. The Muttahida Qaumi Movement Pakistan (MQM-P) has 17 seats.

As part of the PML-N-PPP alliance deal, it was decided that Nawaz Sharif’s daughter Maryam Nawaz would be the chief minister of Punjab province.

Maryam, the political heir of Nawaz, took oath on Monday and became the first woman chief minister of any province in the country.

‘Pakistan Prez may face legal consequences’

Islamabad (PTI): Pakistan President Dr Arif Alvi’s refusal to summon the newly-elected National Assembly for its first session may lead to “legal consequences”, senior leaders of the PML-N and PPP have warned. On Monday, Alvi rejected a move from the caretaker parliamentary affairs ministry to summon the first session of the newly elected National Assembly on February 29.

Alvi, known for his closeness to jailed former prime minister Imran Khan, has maintained that all reserved seats be allocated before the summoning of the session in which newly-elected members of the National Assembly will take oath.

The Prime Minister’s Office (PMO) on Tuesday rejected the objections raised by Alvi, stating that constitutionally, the first National Assembly session should take place within 21 days after the elections, and the president could summon the session before the expiry of the deadline, the Dawn newspaper reported. Under Article 91 of the Constitution, the mandated date for the first session of the National Assembly is February 29.

The Pakistan Peoples Party (PPP) Chairman Bilawal Bhutto-Zardari on Tuesday warned that several cases will be made against Alvi for “abrogating the Constitution”, the report said.

Bilawal said that two cases would be filed against Alvi. The first would be for dissolving the National Assembly when a no-confidence motion was moved against the then-prime minister Imran Khan in 2022, and the second would be for abrogating the Constitution by not convening the National Assembly session. He, however, asserted that his party had no plans to impeach the president, the report said.

‘Navalny’s funeral on Friday’

AP ■ MOSCOW

The funeral of Russian opposition leader Alexei Navalny, who died earlier this month in a remote Arctic penal colony, will take place on Friday in Moscow after several locations declined to host the service, his spokesperson said. His funeral will be held at a church in Moscow’s southeast Maryino district on Friday afternoon, Kira Yarmysh said on ednesday. The burial is to be at a nearby cemetery. Navalny died in mid-February in one of Russia’s harshest penal facilities. Russian authorities said the cause of his death at age 47 is still unknown, and the results of any investigation are likely to be questioned abroad. Many Western leaders have already said they hold Russian President Vladimir Putin responsible for his death. Yarmysh spoke of the difficulties his team encountered in trying to find a site for a “farewell event” for Navalny. Writing on X, formerly known as Twitter, she said most venues said they were fully booked, with some “refusing when we

Yulia Navalnaya, widow of Russian opposition leader Alexei Navalny addresses the European Union’s parliament on Wednesday.

or whether police will arrest those who have come to say goodbye to my husband,” she said.

At some points appearing tearful amid applause from lawmakers but largely resolute, Navalnaya said her husband’s death “showed everyone that Putin is capable of anything, and that you cannot negotiate with him”.

She appealed to the European Parliament to be “innovative” in its approach to the Russian president and those close to him. “You cannot hurt Putin with another resolution or another set of sanctions,” she said, urging lawmakers instead to “apply the methods of fighting organised crime, not political competition”. She asked the parliament to investigate “financial machinations” and “mafia associates” in their countries and “discreet lawyers and financiers who are helping Putin and his friends to hide money”. In introducing Navalnaya, the president of the European Parliament, Roberta Metsola, paid tribute to Navalny.

Wickremesinghe stresses reconciliation issues under 13th Amendemnt

PTI ■ COLOMBO

President Ranil Wickremesinghe on Wednesday said the fate of the missing persons and the ongoing land disputes were posing a major political challenge for the reconciliation of the Tamil minority under the 13th Amendment to the Constitution. Agreements have been reached to release more land and provide a pathway forward, the President said.

India has been pressing Sri Lanka to implement the 13th Amendment (13A), which was brought in after the Indo-Sri Lankan agreement of 1987 and provides for the devolution of power to the Tamil community. “The primary concern at present revolves around the fate of the missing persons. To address this issue, we’ve presented and successfully passed

a bill in Parliament to establish the Truth and Reconciliation Commission (TRC),” Wickremesinghe told a reconciliation seminar here as he outlined the steps taken so far.

The Liberation Tigers of Tamil Eelam (LTTE) had run a military campaign for a separate Tamil homeland in the northern and eastern provinces of the island nation for nearly 30 years before its collapse in 2009 after the Sri Lankan Army killed its supreme leader V Prabhakaran. Wickremesinghe also expressed his intent to tackle other related issues as he said, the TRC has received the pledges of assistance from South African President Cyril Ramaphosa with similar cooperation being extended by other nations as well.

Wickremesinghe further said the ongoing land disputes in the north were a major

political challenge for reconciliation.

“We aim to address these issues through inclusive dialogue, involving all concerned parties. Furthermore, I have instructed proceeding in accordance with the 1985 map,” he said.

Additionally, the President said, he will be meeting with Tamil MPs in Parliament next week to discuss these matters further.

Following consultations with the security forces, agreements have been reached to “release more land, providing a pathway forward in our efforts.” On devolution of power under the 13A, Wickremesinghe said, the granting of police powers to the provinces could be held back for future discussions.

In late 2022, Wickremesinghe initiated a

dialogue with Tamil parties on the full implementation of the 13A without the police powers to the provinces. However, the powerful Buddhist clergy opposition suggested putting it on hold.

To devolve powers to the provinces outlined in the current reserved list, it was imperative to reach an all-party consensus to gain a two-thirds majority, Wickremesinghe said. He also said discussions are underway regarding the implementation of the Provincial Board of Education. Proposals have been made to establish provincial professional training institutes in each province.

Additionally, plans are underway to appoint provincial-level committees to lead the modernisation of agriculture, establish a tourism board, and undertake related initiatives.

Small drone flies into Fukushima N-reactor

Tokyo (AP): A drone small enough to fit in one’s hand flew inside one of the damaged reactors at Japan’s Fukushima Daiichi nuclear power plant on Wednesday in hopes it can examine some of the molten fuel debris in areas where earlier robots failed to reach. Tokyo Electric Power Company Holdings also began releasing the fourth batch of the plant’s treated and diluted radioactive wastewater into the sea on Wednesday. The government and TEPCO, the plant’s operator, say the water is safe and the process is being monitored by the International Atomic Energy Agency, but the discharges have faced strong opposition by fishing groups and a Chinese ban on Japanese seafood.

A magnitude 9.0 quake and tsunami in March 2011 destroyed the plant’s power supply and cooling systems, causing three reactors to melt down. The government and

TEPCO plan to remove the massive amount of fatally radioactive melted nuclear fuel that remains inside each reactor — a daunting decontamination process that’s been delayed for years and mired by technical hurdles and a lack of data. To help on data, a fleet of four drones were set to fly one at a time into the hardest-hit No. 1 reactor’s primary containment vessel.

TEPCO plans to probe a new area Thursday.

TEPCO has sent a number of probes — including a crawling robot and an underwater vehicle — inside each reactor but was hindered by debris, high radiation and the inability to navigate through the rubble, though they were able to gather some data. In 2015, the first robot to go inside got stuck on a grate.

Wednesday’s drone flight comes after months of preparations that began in July at a nearby mock facility.

‘Chinese research ship departs from Maldives’

PTI ■ MALE

A 4,500-tonne high-tech Chinese research vessel which made a port call here last week has left the shores of the Maldives, local media reports said on Wednesday. Officially, the Chinese vessel Xiang Yang Hong 3 was here to “make a port call, for the rotation of its personnel and replenishment.” “Xiang Yang Hong 03 has returned to the boundary of the Maldives’ Exclusive Economic Zone (EEZ) after docking in Male on February 22. However, despite departing from the Male harbour, tracking sites have shown the vessel’s last signal near Hulhumale’ two days ago,” news portal Adhathu.com said.

Hulhumale is less than 10 kms northeast of Male. The vessel had docked on February 23 in Thilafushi, about 7.5 kms to the west of Male.

“The vessel is expected to have turned off tracking systems, which it also did en route to Male’ on January 22 when

it was in the Java Sea off the coast of Indonesia,” it reported. The news portal also provided some details about the type of vessel Xiang Yang Hong 03. The 100-metre-long vessel was added to the fleet of China’s State Oceanic Administration (SOA) in 2016. This is the only 4,500-tonne vessel currently in China. Since 2019, China has also been using the vessel to conduct ‘distant water’ and ‘deep sea’ surveys at China’s Pilot Ocean Laboratory, it said.

The vessel can also be used for studies on salinity,

microbial genetic studies, underwater mineral exploration, and underwater life and environmental studies, it said. It has data buoys that can measure ocean currents, waves, and important environmental information. These buoys will provide real-time satellite information to the Chinese government, the report said.

On January 5, Sri Lanka, while denying entry to the Xiang Yang Hong 03, said it has declared a moratorium on foreign research ships entering its waters for a year

amid concerns from India over Chinese research vessels docking in its neighbourhood.

Incidentally, the Chinese vessel was present near the India-Maldives-Sri Lanka trilateral Dosti-16 exercise that took place in the ocean near Male between February 22 and 25. Earlier on January 23, the new China-friendly Maldives government said it had permitted the research vessel, equipped to carry research and surveys, to dock at Male port, saying the halt was for replenishment and that it would “not be conducting any research while in the Maldivian waters.”

An American think-tank has alleged that a vast fleet of China’s “scientific research” ships is collecting data from the oceans, including in the Indian Ocean Region, for military purposes, especially for submarine operations, a charge denied by Beijing, which said the Chinese vessels operations are in line with the UN Convention on Law of the Seas (UNCLOS).

Norway’s King warded in hospital at Malaysia’s resort island of Langkawi

Langkawi (Malaysia (AP): Europe’s oldest monarch, King Harald V of Norway, remained hospitalised in Malaysia on Wednesday, in the country’s northern resort island of Langkawi, after falling ill while on vacation.

Malaysian national news agency Bernama said the 87-year-old monarch was undergoing treatment at the Sultanah Mahliha Hospital in Langkawi. The report cited unnamed sources as saying he was staying at the hospital’s Royal Suite.

Norwegian TV 2 said the king’s condition is stable, citing the hospital. The hospital declined to comment when contacted by The Associated Press. Malaysia’s health ministry told the media to wait for a possible statement.

The royal palace in Oslo said on Tuesday that the king was hospitalised with an infection but did not give further details. The palace said it may send a statement out later Wednesday.

Two days before his birthday last week, Norwegian news agency NTB said that the king would be undertaking a private trip abroad together with his wife Queen Sonja, without specifying the destination or dates.

The monarch, who has been using crutches in recent years, has been repeat-

edly ill over the past months, raising concern about the head of state’s health. In January, the palace said he was on sick leave until February 2 because of a respiratory infection.

In December, he was admitted to a hospital with an infection and was treated with intravenous antibiotics. He also was hospitalised last August with a fever.

Still, Harald has repeatedly said he has no plans to abdicate, unlike his second cousin Queen Margrethe II of Denmark, who stunned Danes when she announced her step in a New Year’s speech. Each time the king was reported ill, his 50-year-old son, Crown Prince Haakon, has taken over his duties in line with the protocol.

The palace in Oslo told NTB said there were no plans to alter a planned trip by Haakon and Crown Princess Mette-Marit on Wednesday and Thursday to southern Norway.

Ukraine President co-hosts summit in Albania

AP ■ TIRANA

Ukraine’s president co-hosted a summit with Albania’s government on Wednesday that is meant to encourage further support for Kyiv by southeastern European countries, as signs of fatigue grow two years after Russia’s full-scale invasion.

Ukrainian President Volodymyr Zelenskyy arrived before midnight Tuesday on the latest stop in an international tour that saw him in Saudi Arabia earlier Tuesday to push for a peace plan and the return of prisoners of war from Russia.

Zelenskyy on Wednesday called Albanian Prime Minister Edi Rama “Ukraine’s unwavering friend” in a message on X, formerly Twitter, adding the two would “discuss defence and political cooperation, support for the Peace Formula, and security agreements.” “I will propose sup-

Albanian Prime Minister Edi Rama, right, and Ukrainian President Volodymyr Zelenskyy laugh as they wait other officials for the summit of Southeastern European countries on peace in Tirana, Albania, Wednesday.

porting Ukraine’s efforts to achieve just and lasting peace, as well as organising the Global Peace Summit in Switzerland,” he said, referring to the summit.

Zelenskyy and Rama also signed a friendship and cooperation agreement “to strengthen our cooperation with Albania and Ukraine’s position in the Balkans.” Zelenskyy also awarded Rama with the “Yaroslav the Wise” medal for his contribution to Ukraine.

Zelenskyy is accompanied by Foreign Minister Dmytro Kuleba. Rama wrote on Facebook that he was proud to welcome Zelenskyy for “a solidarity meeting and to further the commitment of our democracies against Russian aggression.”

Securing further support is key to Ukraine’s leader while his country faces battlefield challenges. Zelenskyy on Sunday announced that 31,000

Ukrainian soldiers have been killed in action since Russia’s invasion — the first time that Kyiv had confirmed the number of its losses. Ukraine has urged Western leaders to increase the joint production of weapons and ammunition, improve Ukrainian air defences and put new pressure on Russia via expanded sanctions. The head of NATO has said the US-led military alliance has no plans to send troops to Ukraine, and Germany, Poland and other countries this week have said the same.

Eleven countries from southeastern Europe, including some of Ukraine’s neighbours, attended the Albania summit, three of them with online messages, along with officials from the European Union and other international institutions.

US Secretary of State Antony Blinken visited Albania earlier this month.

PARADIP PORT AUTHORITY
HARBOUR WORKS DIVISION NO.1
e-TENDER CALL NOTICE

e-TCN No. CE/HWD/ACCTS/22/162, dtd: 20.02.2024
Name of the work: Cleaning of debris from Roads, berms, backup space & disposal of dredged materials from Port area i.e. from Gate No.4 area to MPB junction to NO-1 via CQ, SQ and EQ area, connecting Road from T-Junction to New IOB in IOHP area and 3-B road (4 lane) leading from IOHP to Wagon Tippler (one year). Put to tender value: Rs.1,27,11,447.66 plus GST as applicable. Last date & time of submission of tender through online bidding is 18.03.2024 up to 11:15 Hrs. For details, please log on to the Website: <https://eprocure.gov.in/eprocure/app>.

Semiconductor manufacturing in India next big space: MeitY Secy

PTI ■ MUMBAI

Domestic manufacturing of semiconductors is the next big space and many companies are expected to venture into this segment, a senior MeitY official said on Wednesday adding that a USD 2 billion digital economy is what India seriously needs.

S Krishnan, Secretary of Ministry of Electronics & Information Technology (MeitY), while speaking virtually at the India Digital Summit (IDS) 2024 said the digital economy is expected to grow at a faster pace in the next few years.

"Semiconductors is the other big space. More companies are likely to come into the space...Our interest in semiconductors is open," he said adding that in the next 5-10 years semiconductor manufacturing in the country is expected to come up in a big way.

About 20 lakh people are employed in the electronics manufacturing sector in the country and the government would like these jobs to go up to about 45 lakh, he added.

"We expect the digital

economy to really grow at an increasing pace in the next few years. A USD 2 billion digital economy is what India seriously needs," Krishnan said. When asked about governance, hygiene and compliance with law for digital economies, Krishnan pointed out that regulators, much like the public, recognized the necessity of regulation. While balancing consumer protection and diverse requirements, regulations are thoroughly examined to ensure safeguarding of user information, he said.

In the tech sphere, consistent collaboration among regulators was crucial, he added.

Similarly, maintaining ongoing dialogue with companies on various IT aspects is essential, Krishnan stated adding that the second key aspect involves formulating regulations to ensure compliance. On the proposed Digital India legislation, he said efforts were being made to enhance it with additional elements. The ministry is exploring ways to address a significant issue related to the idea and understanding of ideas, where different forms of control are in place, he said.

Some of these controls occasionally generate issues, emphasizing the need for regulation, Krishnan said.

Markets tumble due to selling in Reliance, banks

PTI ■ MUMBAI

Benchmark Sensex tanked more than 1 per cent while Nifty declined below the 22,000 level on Wednesday due to selling in index heavyweight Reliance Industries and bank stocks amid weak global market trends.

The 30-share BSE Sensex fell by 790.34 points or 1.08 per cent to settle at 72,304.88 with 26 of its constituents ending in the red and four in the green. During the day, it tanked 872.93 points or 1.19 per cent to a low of 72,222.29.

The Nifty slumped 247.20 points or 1.11 per cent to settle at 21,951.15. As many as 46 Nifty shares closed with losses while four advanced. Among the Sensex firms, Power Grid fell the most by 4.43 per cent due to profit booking by investors. Reliance Industries dropped around 2 per cent, contributing 185.59 points to the slide. IndusInd Bank, Maruti, Wipro, Tata Steel, JSW Steel, Asian Paints, Mahindra & Mahindra and UltraTech Cement were the biggest laggards. Hindustan Unilever, Infosys and Tata Consultancy Services and Bharti Airtel were the gainers. "Indian markets were jittery mirroring weak global markets. Global investors are awaiting the key US economic data like personal consumption expenditure, in anticipation of good forecast there is a fear that Fed rate cut maybe delayed. Turmoil in China's property sector further impacted the Asian market trend," said Vinod Nair, Head of Research, Geojit Financial Services.

In the broader market, the BSE smallcap gauge declined by 1.94 per cent and midcap index went lower by 1.82 per cent. All the indices ended lower. Utilities fell by 2.82 per cent, oil & gas declined 2.19 per cent, realty tanked 2.12 per cent, telecommunication

dipped 1.92 per cent, services (1.89 per cent) and commodities (1.85 per cent). Shares of debt-laden Vodafone Idea plummeted around 14 per cent after the fundraising announcement by the company failed to lift investors' sentiment.

Shares of One97 Communications Ltd, the owner of the Paytm brand, fell 5 per cent to hit a lower circuit limit.

A total of 2,963 stocks declined while 881 advanced and 77 remained unchanged.

In Asian markets, Seoul settled with gains while Tokyo, Shanghai and Hong Kong ended lower. European markets were trading mostly lower. The US markets ended mostly higher on Tuesday.

The BSE benchmark climbed 305.09 points or 0.42 per cent to settle at 73,095.22 on Tuesday. The Nifty ended 76.30 points or 0.34 per cent up at 22,198.35.

Global oil benchmark Brent crude declined 0.90 per cent to USD 82.90 a barrel.

Foreign institutional investors (FIIs) offloaded equities worth Rs 1,509.16 crore on Tuesday, according to exchange data.

Union Finance Minister Nirmala Sitharaman addresses during the 'Bhoomi Pujan' and foundation stone laying ceremony of residential complex 'Hongirana' for the Income Tax officers and staffers, in Bengaluru

Bengaluru tax payers are giving us buoyancy: FM

PTI ■ BENGALURU

Union Finance Minister Nirmala Sitharaman on Wednesday hailed Bengaluru tax payers for their contributions in building a strong and 'Viksit Bharat', and said the Department of Revenue is running its entire national faceless income tax assessment scheme from Karnataka's capital city.

Speaking after laying the foundation stone for the upcoming complex "HONGIRANA" for Income Tax officers and staff here, she said the tax payers of Bengaluru have been absolutely giving us the buoyancy, and thanked all individual and corporate taxpayers in this region for making sure for building a strong and 'Viksit Bharat'.

"Your contribution is relentless. There has never been a dip. So thank you very much Bengaluru for keeping that momentum up", she said.

Sitharaman also emphasised the investments that the Central government is making in Bengaluru.

She noted that the Government has brought about the entire faceless system for income tax assessment and ease of doing business to ensure that tax assessees are not harassed and do not have

the perception that discretion of the officer who they have to go and sit and talk to will make their tax payment difficult.

She said the Department's entire central processing centre — the digital processing unit which governs the entire country — is located in Bengaluru, driving the income tax system for the whole nation. The faceless system was a big step forward in ease of doing business.

"So money doesn't go away from Karnataka. It comes back as well and comes back not just like that...Yes it comes back for roads, it comes back for connectivity, it comes back for metro, it comes back for rail, it comes back for the suburban railway system, It comes back for Mangaluru port, it comes back for the 'Kalyana' Karnataka (region) and so on", Sitharaman said.

"But specifically, I want to highlight the fact that Department of Revenue's entire national faceless scheme runs from Bengaluru and you can imagine therefore, the scale of investment which would have happened for that...I am very happy and proud the manpower is also from Bengaluru and they run the whole system for the country," the Rajya Sabha member from Karnataka said.

Vodafone Idea shares tumble 14 per cent

PTI ■ NEW DELHI

Shares of debt-laden Vodafone Idea Ltd on Wednesday plummeted 14 per cent after the company's fundraising announcement failed to lift investors' sentiment.

The stock plunged 13.99 per cent to settle at Rs 13.65 on the BSE. During the day, it tanked 14.93 per cent to Rs 13.50.

It fell 13.88 per cent to settle at Rs 13.65 on the NSE. During the day, it slumped 14.82 per cent to Rs 13.50 — its lower circuit limit.

The company's market capitalisation (mcap) eroded by Rs 10,806.71 crore to Rs 66,447.95 crore.

Struggling telecom firm Vodafone Idea on Tuesday said its board has approved raising up to Rs 20,000 crore in equity from promoters and other investors by June as it looks to shore up finances for the much-delayed 5G rollout and strengthening 4G services.

The debt-laden firm, where the government also holds just over 33 per cent equity stake, plans to raise Rs 45,000 crore through a mix of equity and debt with hopes of matching services offered by rivals Jio and Bharti Airtel that could arrest subscriber churn.

The fundraising, when it happens, will also arm Vodafone Idea with firepower to improve competitive positioning in the Indian telecom market, where it trails larger rivals Reliance Jio and Bharti Airtel, by a wide margin.

Vodafone Idea has been fighting a desperate battle for survival -- it has a debt of Rs 2.1 lakh crore, is reporting quarterly losses, and is haemorrhaging subscribers month after month.

AI Express aims 40 per cent increase in flights

PTI ■ MUMBAI

Low cost carrier Air India Express plans to operate 40 per cent more flights in the next financial year as well as start services to Nepal, Bangladesh and Sri Lanka, sources said on Wednesday.

The Tata Group-owned airline — which is in the process of merging AirAsia India, now rebranded AIX Connect — is expanding its fleet and expects to complete the acquisition of 50 white tail Boeing 737 Max aircraft by December this year, the sources close to the development said.

At least 13 of these 50 planes have already been inducted

into its fleet. Currently, it operates 350 flights daily and has a fleet of 69 planes.

Generally, a white tail aircraft means that it was actually meant to be delivered to another carrier by the manufacturer. In this case, another source in the know said the planes that are being taken by Air India Express were originally for a foreign carrier, which decided not to go ahead with the order amid pandemic woes.

Going forward, the sources said the airline will focus more on consolidating its operations on the domestic routes and will not be adding many

destinations locally. Services will be introduced in few international routes, including Nepal, Bangladesh and Sri Lanka.

In the next fiscal, the carrier plans to operate 40 per cent more flights as the fleet will also be expanded, the sources

said. More number of flights and services to new destinations will be introduced during the upcoming summer and winter schedules.

Summer schedule starts from late March to late October and winter schedule commences from late October to late

March.

At present, the airline has around 1,300 pilots, including 400 from AirAsia India. About 400 pilots are under training, they added.

Regarding the progress on merging AIX Connect with Air India Express, the sources said the merger is expected to be completed by the second quarter of the next financial year. Once the merger is fully complete then all the planes of AIX Connect will be under the air operator permit of Air India Express.

Currently, three A320neo planes of AIX Connect are under Air India Express' air operator permit.

India super rich allocate 32 per cent of their wealth in housing properties

PTI ■ NEW DELHI

India's super rich have allocated 32 per cent of their wealth in residential properties in the country and overseas, Knight Frank said in a report on Wednesday.

As per real estate consultant Knight Frank's The Wealth Report 2024, 32 per cent of India's Ultra-High-Net-Worth Individuals' (UHNWIs) wealth is allocated towards residential real estate asset class.

Nearly 14 per cent of their residential portfolio is allocated outside India.

UHNWIs are individuals with a net worth of USD 30 million and above.

On an average, an Indian UHNWI owns 2.57 homes while a sizable 28 per cent have rented out their second homes during 2023, the report said.

According to Knight Frank, about 12 per cent of the country's UHNWIs plan to buy a new home in 2024. A similar percentage of wealthy individuals in India purchased a new home last year.

Globally, 22 per cent of the ultra-wealthy are expected to purchase a home in 2024.

Knight Frank India Chairman and Managing Director Shishir Bajjal said, "The prime residential assets continue to be the

mainstream investment avenue for ultra-wealthy individuals in the country."

Separately, the report noted that Mumbai ranked 8th on Knight Frank's Prime International Residential Index (PIRI) index in 2023 as compared to the 37th rank in 2022, driven by 10 per cent year-on-year growth in terms of annual luxury residential price rise.

This jump has marked a place for Mumbai in the top 10 leading luxury residential markets. Manila (26 per cent growth) leads the rankings while last year's frontrunner Dubai (16 per cent) slipped one spot.

The Bahamas (15 per cent) comes in the third place with Algarve and Cape Town (both 12.3 per cent) completing the top five.

Among other Indian cities, Delhi ranked 37th and show-

cased a rise of 4.2 per cent year-on-year in 2023 as compared to the 77th rank in 2022.

Bengaluru stands at the 59th rank compared to 63rd in 2022 recording a 2.2 per cent year-on-year increase in 2023.

"The outlook for 2024 remains bright as Mumbai with a 5.5 per cent prime price growth forecast, ranks second among the 25 cities globally. As we navigate the complexities of the global market, India's emergence as a prime destination for luxury real estate investment is undeniable," Bajjal said.

Of the 100 luxury residential markets tracked, 80 recorded positive to neutral annual price growth.

Asia-Pacific (3.8 per cent) piped the Americas (3.6 per cent) to the title of the strongest-performing world region, with Europe, the Middle East, and Africa trailing (2.6 per cent).

India retail sector to reach USD 2 trillion in next decade: Report

PTI ■ NEW DELHI

India's retail sector is expected to grow at 9-10 per cent to reach USD 2 trillion in the next decade with the country's consumption story continuing to remain strong with steady growth, according to a report.

Yet, organised retailers would need to sustain performance and continue to grow shares as the sector is going through key shifts impacting the pace and shape of growth, said the report by the Boston Consulting Group (BCG) and Retailers Association of India (RAI).

While income growth remains steady, and consumers are optimistic about personal income outlook, consumers are increasingly looking to spend on "experiences" or save more through newer or nascent vehicles, it said.

"The Indian retail sector will more than double in size to USD 2 trillion in the next decade —

across categories and formats — and the successful retailers are the ones who continue to challenge the perceived growth profitability trade-off," BCG Managing Director and Senior Partner Abheek Singh said.

The report said, "India retail (is) expected to grow at 9-10 per cent to reach USD 2 trillion in the next decade." Historically, it added organised retail has outperformed underlying category growth but a slowdown was seen in 2023.

The slowdown in growth was reflected across segments in the recent quarters, it noted.

Airtel switches to recycled PVC SIM cards

PNS ■ NEW DELHI

Bharti Airtel, one of India's leading telecommunications service providers, in partnership with IDEMIA Secure Transactions, today announced that it has switched from virgin plastic to recycled PVC SIM cards.

This is in line with the company's commitment to encouraging the adoption of circular business practices.

IDEMIA Secure Transactions, a division of IDEMIA Group, is a leading provider of payment and connectivity solutions for financial institutions, mobile network operators and automotive manufacturers. An industry first in India, Airtel is the only telecommunications service provider to switch to recycled plastic SIM cards.

With this migration, the generation of over 165 tonnes of virgin plastic will be limited which will further reduce the generation of over 690 tonnes of CO2 equivalent in one year. Pankaj Miglani, Director — Supply Chain, Bharti Airtel, said, "We are delighted to announce yet another first as we continue to lead the Indian telecom industry.

Tata firm Agratas to set up UK biggest EV battery factory

PTI ■ LONDON

Agratas, Tata Group's global battery business, on Wednesday confirmed that it will build Britain's biggest electric vehicle battery manufacturing facility in Somerset, south-west England. The so-called "gigafactory", announced last year, will be built on the Gravity Smart Campus near Bridgwater in Somerset with a community-first approach, involving locals to learn more about and be a part of the project.

The company said the 40 GWh factory is set to contribute almost half of the projected battery manufacturing capacity required for the UK automotive sector by the early 2030s. "Our multi-billion-pound investment will bring state-of-the-art technology to

Somerset, helping to supercharge Britain's transition to electric mobility whilst creating thousands of jobs in the process," said Tom Flack, CEO of Agratas.

"We care deeply about the communities we operate in, so it's imperative to us that we work with, and listen to, our new neighbours

as we build our factory in Somerset. That's why we'll be holding an event for local residents very soon, so we can share more about our plans and introduce our team to the community," he said.

Agratas said it will work closely with local and regional partners, including Somerset Council, Bridgwater and Taunton College, and the wider Gravity Smart Campus, to deliver bespoke education and training programmes in the region, creating local jobs for local people. The factory itself will create up to 4,000 new high-skilled green tech jobs in the area, with thousands more expected to be created in the UK supply chain. Residents living near the site of the future gigafactory campus are set to receive a leaflet through the post this week followed by regular updates on the site's progress.

Preliminary works on the site are in progress, with piling to establish the factory's foundations set to start in the coming months. Construction will be completed in phases, with battery production set to begin in 2026.

Disney, Reliance to merge India media operations

PTI ■ MUMBAI

Walt Disney Co and Reliance Industries on Wednesday announced signing of binding pacts to merge their media operations in India to create a Rs 70,000 crore behemoth.

Reliance and its affiliates will hold a 63.16 per cent stake in the combined entity that will house two streaming services and 120 television channels. Disney will hold the remaining 36.84 per cent stake, the companies said in a statement.

Reliance has also agreed to invest at closing Rs 11,500 crore into the joint venture to give it muscles to fight rivals such as Japan's Sony and Netflix.

Disney+Hotstar has seen its paid subscriber base decline from around 55 million to about 40 million in the first quarter of this financial year because of Reliance's Jio Cinemas winning exclusive rights for live sports.

The combined entity will have the largest OTT subscriber base and close to 120 channels in the country.

Media ventures of Reliance are currently housed in Network 18, which owns TV18 news channels as well as a plethora of entertainment (under the 'Colors' brand) and sports channels. Besides, NW18 has stakes in moneycontrol.Com, bookmyshow and also publishes

magazines. It also owns the news channels CNBC/CNN.

Reliance separately owns a movie production arm - JioStudios - and majority stakes in two listed cable distribution companies, Den and Hathway.

Disney+Hotstar was launched in India in 2020, post the acquisition of the entertainment assets of 21st Century Fox at a valuation of USD 71.3 billion, thereby taking over the operations of Star India and Hotstar. It housed entertainment and cinema channels such as StarPlus and StarGold as well as sports channels like Star Sports.

While Disney+Hotstar rapidly increased their subscriber base initially with the streaming

rights of cricket matches (IPL, World Cup), it lost the bid for the digital streaming rights in 2023-27 cycle, which was won by Reliance-backed Viacom18 for USD 720 billion, 12.92 per cent higher than what Star India had paid on an average per match value.

Nita Ambani will head the joint venture while Uday Shankar will be the vice chairperson.

"Reliance Industries Ltd (and its affiliate) Viacom 18 Media Pvt Ltd and The Walt Disney Company today announced the signing of binding definitive agreements to form a joint venture that will combine the businesses of Viacom18 and Star India," the statement said.

Turmoil in Indian hockey

HI head Tirkey, secretary Bhola deny rift in joint statement

PTI ■ NEW DELHI

Hockey India president Dilip Tirkey and secretary general Bhola Nath Singh on Wednesday denied outgoing CEO Elena Norman's assertion of a rift between them, saying that they are "united" and working in the best interest of the sport.

Norman resigned on Tuesday and in an interview to PTI she alleged that there was factionalism in the body. The 49-year-old Australian suggested that Tirkey and Singh were at loggerheads and also complained of a difficult work environment.

In a joint statement, Tirkey and Singh rejected Norman's claims.

"Recently there have been statements by outgoing officials published in the media, claiming that there are divisions within the organisation. This is not correct. We remain united in working together, and as always in the best interest of the sport," the two said.

"Hockey India is an autonomous and professional body dedicated to the

development of Indian hockey. Our primary objective as an organisation has been and continues to remain the welfare and progress of the sport of hockey and our athletes."

Norman's resignation was the second blow to HI in the last few days after the Indian women's hockey team coach Janneke Schopman resigned,

also complaining of a difficult work environment. Schopman had accused HI of giving step-motherly treatment to women's hockey. Tirkey and Singh said HI has always treated all teams and players equally and also claimed to have built an environment of equality in the organisation.

"We have built our ethos

around equity and equal opportunities right from the grassroots levels across states as well as on a national level," their statement read.

"In this spirit, our entire focus remains on growing our talent, ensuring all hosted events are conducted with utmost professionalism and our national teams are receiving the best support to

support their performance at the global stage."

Norman began her tenure as the federation's first CEO back in 2011 with Narinder Batra as the head. After resigning, she stated that it was difficult for her to continue given the bickering inside HI.

"There are two factions in Hockey India. There is

(President) Dilip Tirkey and I and there is (Secretary) Bholanath Singh, (Executive Director) Cdr. R K Srivastava and (Treasurer) Sekar J Manoharan," she said.

"There are guys who want power and then there is (HI President) Dilip (Tirkey) who is a nice guy, only after betterment of Indian hockey," she explained.

Tirkey and Singh said their focus is now on rebuilding the women's team, which failed to qualify for the Olympics, and helping the men's side that is due to compete in the quadrennial showpiece in Paris this year.

"We will continue in this pursuit of excellence and rebuild the women's team with a fresh approach to providing the right infrastructure and training to enhance their performance," they stated.

"In addition to this, we are cognisant of this being an Olympic year and are dedicated to aide the National Men's Team with the required support to stand on the podium yet again in the forthcoming Olympic Games in Paris this year."

Logan heads into 2nd F1 season stronger

AP ■ BAHRAIN

Even before Logan Sargeant finished his rookie Formula 1 season, a set of expectations were given to the American on what he needed to do to keep his ride at Williams. It still took until December for Williams to confirm Sargeant would get a second season. He was the last driver finalized for this year's 20-car grid.

But he enters the new season - it starts this weekend in Bahrain - already ahead of schedule.

"First and foremost, I've asked him to surprise the world in terms of his physical fitness, his approach and his performance," Williams team principal James Vowles said.

"We've changed quite a bit with him across the winter period, his trainer is different, his training programs are completely different. You should see he's a much more confident person and he carries that well."

Sargeant delivered on Vowles' ask by adding a little more than 11 pounds to his frame during the offseason - muscle that should help the Floridian with car handling a year after he was consistently outperformed by teammate Alex Albon.

Sargeant scored just one point all of last year and it didn't come until the U.S. Grand Prix, five races before the end of the season. Albon, meanwhile, scored 27 points across the season and was ranked 13th in the final driver standings.

"I wasn't physically in the place I need to be and I've done everything I can to get on top of that. For example, I'm five kilos heavier than I was at the end of last year, and I feel much more healthy and much more ready to go," Sargeant said.

"I feel like a different man, I feel like physically I am in the best shape I've ever been.

And I believe in the condition I'm in now, and will continue to get to, will be simply just helping me feel more comfortable in the car and extract performance."

Sargeant is the first American to race in F1 since Alexander Rossi in 2015 and his underwhelming rookie season did little to build a fanbase in the lucrative United States market that hosted a series-high three races last year.

But Williams last year had a car that was difficult to drive and both he and Albon were forced to adapt. Albon believes this year's FW46 will be easier for Sargeant to handle.

"Logan will have that experience now into this year, I don't think it'll be so much of a learning curve for him," Albon said.

"I personally believe that the car's going to be a bit easier to drive. Our car was very unique. I spent two years refining a very strange driving style, which for someone coming into the car for the first time, without any prior F1 experience, is difficult.

"It was very easy to overdrive the car. I think naturally the car's going to go towards him as in a bit less on a knife edge and more usable," Albon continued.

"So I think what you're going to see is a guy with a lot more experience and a car that should be more usable and that will in itself bring performance."

Vowles agreed that this year's car should help both Albon and Sargeant as Williams tries to become competitive again.

"We should have a car that is more suiting to both drivers," Vowles said.

"I'm hoping that we've got rid of some of these really nasty effects from last year, but that will also make a platform for him where he should be able to grow much quicker than he did in 2023."

Altmaier stuns Zverev

AP ■ ACAPULCO (MEXICO)

Daniel Altmaier pulled off a major upset, beating top seeded Alexander Zverev in a battle of German players to qualify for the second round of the Mexican Open.

The 27-year-old Altmaier and world's 57th ranked player defeated his countryman for the first time in three tries in 2:26 hours and will play Miomir Kecmanovic next.

Zverev, sixth in the ATP rankings, lost a seven-match winning streak against German players. His previous loss against one was in 2019, when he fell to Dustin Brow, in Stuttgart.

Earlier, second-seeded Holger Rune eased past American Michael Mmoh 6-2, 6-3 and advanced to the second round.

Rune, ranked seventh in the ATP, needed 92 minutes to dispatch Mmoh, who made his way into the main draw through the qualification tournament.

The 20-year-old Rune, from Denmark, reached the semifinals in Acapulco last year and now will meet Aleksandar Kovacevic, who took care of Jordan Thompson 6-3, 5-7, 6-4.

Earlier, fifth-seeded Stefanos Tsitsipas defeated Roman Safiullin 6-3, 6-4 and moved on to the second round where he will face Flavio Cobolli.

The 25-year-old Greek reached the semifinals last week in Los Cabos, Mexico, and is trying to win his first career 500 tournament.

Also Tuesday, Frances Tiafoe, seeded eighth, rallied to beat Max Purcell 4-6, 6-3, 6-0. He moved on to face Dominik Koepfer, who took care of Terence Atmane 6-4, 4-6, 6-0.

Tiafoe is the highest-ranked American player in contention in the tournament after fourth-seeded Taylor Fritz and seventh-seeded Tommy Paul were knocked out on Monday.

In another result, Casper Ruud outlasted Christopher Eubanks 6-4, 6-7 (5), 6-3 and moved on to the second round.

Ruud is going to play against Dusan Lajovic, who beat local Rodrigo Pacheco 6-2, 6-2.

OLYMPICS

Anju says Parul among ones to watch out for

PTI ■ NEW DELHI

Athletics Federation of India vice-president Anju Bobby George on Wednesday said Asian Games gold-winning steeplechase runner Parul Chaudhary is among the ones to watch out for at this year's Paris Olympics where she expecting more than one medal in javelin throw.

So far, nine Indian track-and-field athletes have qualified for the Games in July-August with defending gold-medallist Neeraj Chopra and Kishore Jena making the cut in javelin throw.

Chaudhary shot into limelight with a gold in the 5000m and a silver in 3000m

steeplechase events of the Hangzhou Asian Games last year. The 28-year-old is the first Indian to clock less than nine minutes in the 3000m women's steeplechase.

"A bunch of athletes are performing really well in the international arena from athletics. We are aiming for three (medals) in javelin," she told PTI Video on the

sidelines of Bharat Sports Science Conclave in New Delhi on Wednesday.

"Then we have long jumpers, we have triple jumpers, steeplechase runner Parul Chaudhary is among the ones to watch out for but a lot cannot be predicted about the Olympics," she added.

A legend in her own right, who won a trailblazing world championship bronze in long jump, George said she is mighty pleased with how technology has been incorporated to improve training of athletes.

"A game-changer I can say, nothing was like this in our time, the changes that are happening in Indian sports, and sports science is playing a big role in

every athlete's career.

"Every athlete is challenging his body, he needs recovery and treatment, and it was not there in India (in the past), but now we are aiming for the Olympics. We are talking about sports science, doping issues, recovery and training, so it is a game changer I can say," she said.

The other Indian athletes to have qualified for the Paris Games so far are Avinash Sable (men's 3000m steeplechase), Akashdeep Singh, Vikas Singh and Paramjeet Singh Bisht (men's 20km walk), Priyanka Goswami (women's 20km walk), and Murali Sreeshankar (men's long jump).

Vekic, Yastremska are among those advancing in Cymbiotika San Diego Open

AP ■ SAN DIEGO

Croatia's Donna Vekic and Ukraine's Dayana Yastremska were among those moving into the second round of the Cymbiotika San Diego Open. Vekic, a finalist here in 2022, beat local wildcard Katherine Hui, 7-5 6-2 in her WTA Tour singles debut on Tuesday. A Santa Fe

Christian School graduate now playing on the collegiate level at Stanford, Hui is the reigning US Open girls' singles titlist.

A first-time major semifinalist last month at the Australian Open, Yastremska had to dig deep in outlasting American Caroline Dolehide, 6-4 5-7 6-1. The 23-year-old was up a set and a break only

to have her opponent force a decider. Yastremska overcame nine double faults in the two-hour, eight-minute matchup.

German veteran Tatjana Maria, 36, advanced when eighth seed Leylah Fernandez retired with a left shoulder injury trailing 0-4 in the second set. It marks the third consecutive year the 21-year-old Canadian, a US Open finalist in 2021, has failed to reach the second round in San Diego.

Czech Katerina Siniakova, a doubles titlist here last year with countrywoman Barbora Krejckikova, beat Japanese qualifier Mai Hontama 6-3 6-1, in one hour and 13 minutes. Australian wild card Taylah Preston was a 6-4 4-6 6-1 winner over Poland's Magdalena Frech.

Liverpool injury list worsens

AP ■ LIVERPOOL (ENGLAND)

Liverpool's injury crisis keeps on getting worse.

Ryan Gravenberch is the latest name to be added to an ever-lengthening list of players unavailable to the Premier League leader, while Wataru Endo is a doubt for Wednesday's FA Cup fifth round match against Southampton.

Gravenberch sustained an ankle injury in the first half of Sunday's English League Cup final triumph against Chelsea and was taken off on a stretcher.

Endo left Wembley Stadium on crutches and wearing a protective boot.

"We need miracles with a few players," Liverpool manager Jurgen Klopp said Tuesday.

"I don't want to rule them out for too long. But it is touch and go with a lot of players who were not available for

the final: Darwin (Nunez), Mo (Salah), Dom (Szoboszlai) - we have to see what they can do."

Haaland scores five goals in Man City 6-2 rout

AP ■ MANCHESTER

Erling Haaland looks determined to make up for last time.

The Norway striker scored five goals to power Manchester City into the quarterfinals of the FA Cup in a 6-2 win against Luton on Tuesday.

It was his eighth hat trick in a season-and-a-half with City and the second time he has scored five in a single game for the club.

Perhaps more significantly, it was evidence that Haaland is fully back up to speed after recently returning from a foot injury that ruled him out for more than a month between December and January.

"My fitness is getting back to its best finally," he said.

"I feel good. It's an amazing feeling."

Haaland had scored only three goals in seven appearances since making his comeback on January 31.

By his remarkable standards, that represented a relative drought, but he looked back to his devastating best at Kenilworth Road with a first-half hat trick and two more after the break. Four of those goals came from assists by Kevin De Bruyne, who has also missed large parts of the season through injury.

"It's a pleasure playing with him," Haaland said.

"I think we know what we both want from each other, we look at each other and it clicks well."

Mateo Kovacic added a sixth for City, while Jordan Clark struck twice for Luton.

Haaland was denied a possible double hat trick when he was replaced by

Julian Alvarez in the 77th minute. It was the second time City manager Pep Guardiola substituted the striker after scoring five goals, having taken him off during the 7-0 rout of RB Leipzig in the Champions League last year.

Haaland now has 27 goals in all competitions for the season after scoring 52 in his first year at the club.

His performance and linkup play with De Bruyne will also fuel the belief City can emulate last season's treble of trophies when it won the Premier League title, FA Cup and Champions League.

"We're coming. Exciting times (are) ahead," Haaland said.

The forward completed his hat trick after 40 minutes, having opened the scoring in the third and adding a second in the 18th.

UV Asset Reconstruction Co. Ltd ("UVARCL")
Corporate Office: 1304, Chiranjiv Tower, 43, Nehru Place, New Delhi - 110 019

PUBLIC NOTICE FOR SALE

This public notice is being issued in terms of Securitization and Reconstruction of Financial Assets and Enforcement of Security Interest Act 2002 (SARFAESI) read with rules 6, 7, 8 & 9 of Security Interest (Enforcement) Rules, 2002. Pursuant to the possession of the properties/secured assets detailed herein below, having been taken by the undersigned as "Authorized Officer" of UV Asset Reconstruction Company Limited (UVARCL), an Asset Reconstruction Company registered with Reserve Bank of India under the provisions of Securitization and Reconstruction of Financial Assets and Enforcement of Security Interest Act 2002, for recovery of secured debts of UVARCL, it has been decided by the undersigned to sell the properties of under-noted borrowers/guarantors detailed herein below. Offers are invited under sealed covers by the undersigned from intending purchasers/ bidders for purchase of the property/ies described herein below on "AS IS WHERE IS BASIS, AS IS WHAT IS BASIS AND WHATEVER THERE IS BASIS":

Name of the Account Borrower/ Mortgager	Claim amount as per Demand Notice	Description of Property/ies	Reserve Price Earnest Money (10%)	Possession Status
Borrower – M/s BSR Diagnostic Limited (Regd. Office: 15, Commercial Complex, Nehru Nagar (F), Bhilai, Distt. Durg (CG) Pin-462020) and its 'Guarantors'	Rs. 66,67,45,675/- (Rupees Sixty-Six Crore Sixty-Seven Lakhs Forty-Five Thousand Six Hundred and Seventy-Five Only) outstanding as on 30.04.2017 together with further interest from with effect from 01.05.2017 at contractual rates on aforementioned amount together with incidental expenses, cost, charges etc. less subsequently credits, if any.	Diverted Residential Plot No E-2, Type A-1 part of Khasara No. 7/35, VIP City, Kushi Bhau Thakare Ward, Ward No 26, Mouza Saddu, Raipur (CG) together with Construction thereon in the name of Dr. Manmohan Kumar Khanduja S/o D.P Khanduja, Land Area : 2400 Sq. Ft. (40'X60'), Plinth Area 1006 Sq. Ft, Boundaries: East: Road, West: Plot No F-2, North: Plot No E-3, South: Plot No E-1.	Rs. 86,00,000/- Rs. 8,60,000/-	Physical Possession taken on 12.02.2024

DATE & TIME OF INSPECTION OF PROPERTIES: Between 11.00 AM to 5.00 PM between **01.03.2024 to 14.03.2024;**
LAST DATE AND PLACE OF RECEIVING OFFERS: UV Asset Reconstruction Company Limited, 1304, Chiranjiv Tower, 43, Nehru Place, New Delhi -110019 till 02.00 PM on **16.03.2024;**
DATE AND PLACE OF OPENING TENDERS: At the Corporate Office i.e., UV Asset Reconstruction Company Limited, 1304, Chiranjiv Tower, 43, Nehru Place, New Delhi -110019 on **16.03.2024** at 04.00 PM;

Terms & Conditions:
The detailed terms and conditions of the sale are accessible on the website of the Secured Creditor at www.uvarcl.com.
For any query you may please contact on 9319164656, 9477305326 between 10 a.m. to 5 p.m. or write to us on resolutionteam@uvarcl.com, uvarcl@gmail.com
This is also a notice to the Borrower/guarantor/mortgagor of the above said loan about holding this sale on the abovementioned date if their outstanding dues are not repaid in full.

Date: 29.02.2024
Place: : Raipur

RAHUL STILL FEELING SORE WHILE BATTING IN NETS

PTI ■ NEW DELHI

Senior India batter K L Rahul is unlikely to feature in the fifth and final Test against England in Dharamsala as he continues to feel sore in his right quadriceps. Rahul became unavailable after the series-opener in Hyderabad in January but as per BCCI, he was 90 per cent fit before the third Test in Rajkot earlier this month. Rahul has now travelled to London to get an expert opinion on his injury and with the series in the bag, the Indian team management will not take the risk of playing him in the Dharamsala Test beginning March 7. He needs to be fully fit before the IPL where he will lead Lucknow Super Giants and is expected to bat in the middle order to bolster his chances of making the India squad for the T20 World Cup in the USA and the Caribbean. "It is more to get an expert opinion (travel to London). He experiences a bit of pain (right quadriceps) while batting. It is to ensure that he recovers fully as he is a player that team needs long-term. "There is so much competition coming his way -- IPL, he could also be in the T20 World Cup mix. Then we have some important Test series against New Zealand, and Australia later in the year.

UNLIKELY FOR DHARAMSALA TEST

So, it is better to give him time to recover properly than rushing him," an IPL source told PTI. It is the same quadriceps injury that had sidelined Rahul for almost four months last year. Having got injured during the IPL, Rahul returned to action with the Asia Cup in September and made instant impact. In the more recent Test tour of South Africa, Rahul was the only century maker from India in the drawn series. His absence from the final Test means Rajat Patidar will remain with the squad but the MP batter can't be sure of his place in the playing eleven, having aggregated only 63 runs in six innings. There is a possibility that Patidar will make away for Devdutt Padikkal in Dharamsala. **BUMRAH SET TO RETURN:** India's premier pacer Jasprit Bumrah, who was rested for the Ranchi Test, is expected to lead the attack at the HPCA Stadium. The series is sealed but every Test match offers crucial World Test Championship points and Bumrah can play a big part in the cooler climes of Dharamsala. India are second in the standings with five wins, two losses and a draw. New Zealand lead the table with a winning percentage of 75 but they have only played four Tests.

Jaiswal rises to 12th in ICC Test rankings

PTI ■ DUBAI

India's latest batting sensation Yashasvi Jaiswal advanced towards a top-10 spot in the ICC rankings for Test batters by climbing three spots to 12th while his compatriot Dhruv Jurel leapfrogged 31 places to 69th on Wednesday. The T20I Rankings see Jaiswal, who started the series in 69th position, continues his ascent to the top after scores of 73 and 37 in the fourth match of India's ICC World Test Championship series against England in Ranchi. Player of the Match Jurel's scores of 90 and 39 has jumped a whopping 31 places while former England captain Joe Root is back in the top three. Root, a formerly top-ranked batter, struck an unbeaten 122 in the first innings in Ranchi to move up two places to third position. He also moved up three spots to fourth among all-rounders. Senior spinner Ravichandran Ashwin's five-wicket haul in the second innings has helped him narrow the gap with top-ranked Jasprit Bumrah to 21 rating points at 846 after the fast bowler was rested for the Ranchi Test. Wrist spinner Kuldeep Yadav moved up 10 places to the 32nd spot and England's

Shoaib Bashir, who climbed 38 places to 80th, have also attained career bests. Opener Zak Crawley entered the top 20 for the first time after scores of 42 and 60, while a bunch of spinners have also prospered in the latest weekly update. The T20I Rankings see Australia batter Travis Head move into the top 20 for the first time after scores of 24, 45 and 33 in the series against New Zealand. Tim David's quickfire 31 off just 10 balls in the first match see him move up six places to 22nd and past the 600-point barrier for the first time in his career. The top six bowlers are unchanged, with Josh Hazlewood the only new one in the top 10 after finishing with figures of 4-1-12-1 in Auckland. In the ODI rankings, the biggest mover has been Namibia's Bernard Scholtz, whose hauls of four for 31 against Nepal and two for 15 against the Netherlands in the ICC Men's Cricket World Cup League 2 Tri-Series in Kirtipur have lifted him to 11th position and 642 ratings points, the highest position and points tally ever achieved by a Namibia player in ODI cricket.

Muzumdar looks to create fast bowlers pool from WPL

PTI ■ BENGALURU

With just seven months left for the Women's T20 World Cup to begin in Bangladesh, India head coach Amol Muzumdar is keen to identify and build a pool of fast bowlers from the on-going Women's Premier League. The Indian pace unit looks a bit thin after the retirement of legendary Jhulan Goswami and moving on from veteran Shikha Pandey. Currently, the Indian pace bowling is marshalled by Renuka Singh, Pooja Vastrakar, Titas Sadhu and Amanjot Kaur. "Four fast bowlers played the last series (against Australia). I want to create a pool of fast bowlers (from the WPL). It makes a lot of difference if you strengthen the bowling attack," Muzumdar was quoted as saying ESPNcricinfo. "I would want another pool of 20-25 players to create a bench

strength for the Indian team," he added. The ninth edition of the Women's T20 World Cup will be held in September-October in Bangladesh.

Muzumdar had taken over as India coach last year ahead of home series against England and Australia. While India won the Tests against the visitors, they lost the T20I and ODI series. Muzumdar was also delighted to see front-line Indian batters such as Shafali Verma, S Meghana and Richa Ghosh among runs ahead of the marquee event later this year. "There is an upscale movement in India's batters. The confidence from those two series against England and Australia is on display (here) because of how they performed there." The former Mumbai batsman was also chuffed to see the presence of mind Sajana Sajeevan showed while carrying Mumbai Indians to a victory over Delhi Capitals with a last-ball six. "Sajana's six gives you an idea of the depth in Indian cricket," said Muzumdar.

Conway out, Ravindra in for New Zealand ahead of 1st test against Australia

AP ■ WELLINGTON (NEW ZEALAND)

Devon Conway has been ruled out but Rachin Ravindra has been cleared to play for New Zealand in the first cricket test against Australia starting at the Basin Reserve on Thursday. Conway suffered a thumb injury while keeping wicket in the second Twenty20 international between the teams on Friday last week. While initial scans suggested there was no fracture, additional tests in Wellington in recent days have found there is damage to Conway's left thumb. Conway will have further tests later in the week. Meantime, Will Young open the batting with Tom Latham in Conway's place. Henry Nicholls, who was dropped from the New Zealand team ahead of its two recent tests against South Africa - both victories - has been recalled to provide reinforcement for the batting lineup. "It's disappointing for Devon to be ruled out on the eve of an important match," New Zealand coach Gary Stead said. "He's a class player batting at the top of the order for us and I know he was really looking forward to this series."

Ravindra missed the second and third Twenty20s against Australia with a slight knee injury but is fit to play from Thursday. He scored a maiden double century in the first innings of the first test against South Africa. Daryl Mitchell is also available after missing the South Africa series with a foot injury. Captain Tim Southee said New Zealand will settle on its match lineup after assessing conditions at the Basin Reserve where the pitch usually is green at first but good for batting. New Zealand will decide whether to go into the match with four

seamers or to include spin-bowling allrounder Mitchell Santner. New Zealand left Santner out of its lineup for the second test against South Africa at Hamilton, using four seamers. "I think in hindsight, we probably got that wrong the way that the pitch did behave," Stead said. "We've certainly got Mitch Santner here as that option and we'll certainly consider him as well." Australia captain Pat Cummins has named an unchanged starting XI for the test. Cummins confirmed Wednesday there would be "no surprises" in the starting XI, with Australia picking the same team that lost to the West Indies in the second test in Brisbane last month. "It's always nice to have a full contingent to pick from," Cummins said. "I doesn't feel like we need to reinvent the wheel." The two-test series against Australia will be one of the few occasions New Zealand has a faced a full-strength Australia lineup. New Zealand and Australia only rarely meet in test series and Australia at times has not fielded its best team. New Zealand currently is first and Australia third in World Test Championship standings.

Renuka set tone for RCB by controlling Powerplay: Molineux

PTI ■ BENGALURU

Renuka Singh has managed to control the Powerplay period by providing early breakthroughs and stopping run-flow with her swing bowling which played a significant role in RCB winning both its games, says team spin all-rounder Sophie Molineux. Royal Challengers Bangalore (RCB) are sitting on top of the table with four points. Mumbai Indians (+0.488) also have four points but they are placed second behind RCB who have better NRR of +1.665. RCB had restricted Gujarat Giants to 107 for seven on Tuesday night with Renuka returning impressive figures of 4-0-14-2. RCB then overhauled the target in 12.3 overs to log their second win on the trot. "Renuka has been incredible in both games and playing against her for India, she's just so reliable and it's great to be on the same team as her. She swings the ball beautifully at the front and I think she's really set the tone for us in both games," Molineux said. In their opening game against UP Warriorz, Renuka did not dismiss any batter but conceded only 14 runs in her 3 overs. RCB had edged UPW by just two runs to begin the tournament with a thrilling win.

"To be able to control the powerplay is a big thing in T20 cricket and she's done that twice now and I can see her continuing to do that," the Australian cricketer said. Role clarity for every player and adaptability is part of the RCB approach under coach Luke Williams. In their opening match against UPW, the RCB opted for swing from one end and spin from the other, while against GG, Renuka Singh and her pace colleague Sophie Devine bowled in tandem up front. Molineux, who took three wickets herself after Renuka's new-ball burst, said her team has flexibility. "In T20 cricket as a bowler you need to be really clear on what your strengths are and what you can bring to the team. And I think Luke and all the staff have been really clear with each bowler with what their roles are going to be and also at the same time be willing to adapt like we did today. "We had a completely different look to our powerplay where we were really pace-heavy. So yeah, I think that's all a part of T20 cricket, especially just being really clear on your own individual plans and where that fits in with the team and being able to change on the fly," Molineux said. RCB will take on third-placed Delhi Capitals in their next match on Thursday.

Zaheer was someone I used to watch a lot: Anderson

PTI ■ NEW DELHI

James Anderson, England's greatest fast bowler with an unparalleled longevity and nearly 1000 international wickets, says he has learned a few elements of pace bowling, including reverse swing, from Indian great Zaheer Khan. At 41, Anderson continues to lead the England attack and is two short of becoming the first fast bowler in the history of the sport to breach the 700-wicket mark. Spin legends Muttiah Muralitharan and the late Shane Warne are the only bowlers with 700 plus wickets in Test cricket. "For me, Zaheer Khan was someone I used to watch a lot to try and learn from. How he used the reverse swing, how he covered the ball when he ran into bowl, that's something I tried to sort of develop on the back of playing against him quite a few times here," Anderson told JioCinema. Zaheer, one of India's finest seamers, played his last Test

in 2014 when Anderson was at the top of his game. Among the current lot of Indian pacers, Anderson is most impressed by Jasprit Bumrah's ability, calling him a "great exponent" of reverse swing. Asked about Bumrah's match-winning performance in the second Test against England, Anderson said, "With someone of his quality you expect that standard from him. You know that reverse swing can play a big part in India and he's a great exponent of it. He's got good pace and is very accurate, very consistent. "That yorker we saw to Ollie Pope, he's got that up his sleeve as well. It's not a fluke that he's got to number one in the world. He's a world-class bowler and from our point of view we weren't surprised that he put up a performance like that." The seasoned Englishman added, "There are not many better bowlers than Bumrah, Shami and Siraj. They're world-class bowlers. You put Ishant Sharma in there as

well, and that's a really strong bowling attack." Anderson's longevity in the game can be ascertained by the fact that his current England teammates such as Shoaib Bashir and Rehan Ahmed were not even born when he made his Test debut way back in 2002. Having played 186 Tests and 194 ODIs over the last 22 years, Anderson's desire to be competitive remains intact. On comparing his longevity to other sporting legends, Anderson said, "Yeah, I guess you do look at things like that, but to be honest, I just go with the feel of me and my body. I don't feel like I'm 41 years and 200 days old. You know, I still feel young. "I can keep up with the young guys in training. I can still bowl the speeds that I want to, I can still deliver the skills that I want to. So, for me that's the most important thing. Age is just a number and it's pretty irrelevant from my thought process." When the discussion turned to reverse swing, Anderson said the art remains relevant

even in an age dominated by T20 cricket. "I don't think it's dying. Because of the growth of white-ball cricket in recent times, the focus has moved to change of pace and different deliveries like yorkers, and things like that. "But for me, in Test cricket, we've seen throughout this series already that swing can play a big part. "The way Bumrah's bowled, I think, has been amazing to watch. That reverse swing spell in the second Test was one of the best you'll see. For me, I think there's still people out there wanting to learn the skills and it's not easy to do." With star batter Virat Kohli skipping the ongoing Test series due to personal reasons, Anderson said he missed bowling to the Indian maestro with he had had some fascinating duels. "You always want to play against the best players. And it's been a shame that he's not been a part of the series. We have had some great battles over the years."
