Editor’s note: The year marks the 70th anniversary of the founding of the People’s Republic of China. Over the past seven decades, China has developed from a poor, weak country to becoming the second largest economy in the world. This issue, we continue the column called “Remarkable 70 years” to help you understand the great changes that have taken place in New China.

Since the founding of New China, the Party and the Government have attached great importance to energy development, and the supply has been guaranteed and the structure has been increasingly optimized. It is said that China’s natural gas consumption reached 280.3 billion cubic meters in 2018, up 18.1 percent over the previous year. China supports B&R cooperation to achieve high-quality pact

The world bank released a report titled “Better Road, Better Road: Economic Opportunities and Implications of the Belt and Road Initiative” last month. In response to the question of whether China’s Belt and Road Initiative is making good progress, the World Bank’s Global Director for Sustainable Development and Environmental Protection, Jim de Groote, said in the report, “In recent years, China has made a good start in terms of cooperation and implementation of the ‘Belt and Road’ economic and trade cooperation and a great progress in many participating countries, enhanced cooperation, and the contribution to the global trade facilitation and economic growth.” The World Bank report made a positive evaluation that B&R cooperation achieves high-quality cooperation.

Meanwhile, our correspondent interviewed Ms. Xi Jinping, President of the People’s Republic of China and Indian Prime Minister Narendra Modi continue to strengthen triilateral cooperation on the sidelines of the G20 Summit in Osaka, Japan, and discussed the enhancement of bilateral and multilateral relations.

Chinese President Xi Jinping, Russian President Vladimir Putin and Indian Prime Minister Narendra Modi continued to strengthen triilateral cooperation on the sidelines of the G20 Summit in Osaka, Japan, and discussed the enhancement of bilateral and multilateral relations. Since the founding of New China, the Party and the Government have attached great importance to energy development, and the supply has been guaranteed and the structure has been increasingly optimized. REMARKABLE 70 years

Local residents have been extending their arms for their nearest neighbors from the countries and regions, supporting them to reach academic pinnacles and paving the way for their careers. Lead and labor are the secrets they cherish the most.

Song Xiaohui, from Indon- esia, was the first student to en- roll the Belt and Road School in Xiamen University in 2016. She has become the first in her family in a generation to go to college. Her experience has shown how easy it was to respond to the question “why I deserve to go to the university.”

Instead, “a strong commit- ment to education” is one of the advantages of the developing world.”

The other qualifications. The only thing that the students need to achieve is the corresponding educational level of the university.

In the developing world, the opportunities are enormous. Creating an opportunity for each student in the developing world is a matter of education. And the opportunity will help you understand the great changes that have taken place in New China.

Since the founding of New China, the Party and the Government have attached great importance to energy development, and the supply has been guaranteed and the structure has been increasingly optimized.
