Yunnan leads the country in biodiversity

The national botanical museum of China will be built in Kunming

In the pool of Mang'ao, on the south side of Dali, Xishuang Ban Na or Dali Kingdom is a spring that flows every year and the water cannot stop rising. This is one of the most famous places in the Kunming area. The nature lovers of Kunming 10 kilometers away, with great capacity to support a small team of protection. In Xishuang Ban Na and other places in Yunnan, there are a large number of tropical rainforests, where there are more than 20,000 plant species. Giant trees over the sky and wild elephants walk through the forest, are the most important treasure houses of biodiversity in China. Yunnan has been considered the natural base for the highest tropical rainforests.

In Yunnan, plants have been found for more than one thousand years. Treasures of wood and bamboo, indigenous and precious Chinese medicinal materials in Yunnan, accounting for 15% of the national resources of medicinal plants by planting area of Chinese medicinal plants, the richest in Yunnan. Today, Yunnan is still an important traditional Chinese medicine development and research center, which is the main base for the collection of medicinal plants and resources. In Yunnan, people have long used a variety of medicinal plants. The wild people go into wild forest in early spring in the morning and harvest in the gift of nature. The expensive traffic, fragile existence and their pocket fenders... Mankind also respect and use it more than any other people in the travelers in their trip.

Yunnan province has 92% of the national total biodiversity, 18% of the national total species level, 15% of the national total species level, and 10% of the national total species level. The biodiversity is so rich that Yunnan is called "the paradise for biodiversity." In Yunnan, we can find a variety of plant species, such as ferns, conifers, deciduous broad-leaved trees, evergreen broad-leaved trees, and bamboo forests. We can also find a variety of animal species, such as birds, mammals, reptiles, amphibians, and invertebrates. Yunnan is known as the "Paradise of Biodiversity" because of its rich and diverse natural resources. The biodiversity of Yunnan is not only a natural treasure, but also an important resource for scientific research and conservation.

India becomes trendy destination for Chinese travelers

EXPO
The 2nd China Import Expo to be held in Shanghai

The 2nd China Import Expo will take place from November 5 to 10. The expo will mark the start of China's new open-door policy and the expansion of its market to other countries.
