China focuses on quality development

China’s decision not to cut GDP growth targets for this year does not mean it no longer values economic growth, but shows its awareness of growing global challenges and its need to ensure high-quality development. Chinese Vice-Premier Li Keqiang said at a meeting delivered the Government Work Report, which was the third session of the Chinese People's Political Consultative Conference (CPPCC) and the National People's Congress (NPC).

In the report, Li said China had achieved a GDP growth target for this year, which was remarkably admired by the international financial markets and the world. “It has been hit by the pandemic,” said President Xi Jinping, who is the leader of the CPPCC and the NPC.

Wang made the remarks while announcing the government’s measures concerning China’s assistance to other countries hit by COVID-19 at a press conference on the sidelines of the National People’s Congress on Sunday.

Wang said China had been in the lead in fighting the COVID-19 pandemic in the country, and that it was the only one to implement a mass-testing strategy in the world.

The draft decision of the National People’s Congress, China’s top legislature, to enact a law to fix the wrongs of the Hong Kong Special Administrative Region (HKSAR) is a long overdue move. It will help build a secure, prosperous and stable society in the region, and a strong and powerful country.

China is not a savior, but is willing to be a friend and a partner for mutual help in times of difficulties, said Chinese State Councilor and Foreign Minister Wang Yi. China is a principle advocate of multilateralism and a strong supporter of international cooperation.

China’s policies on “safety nets” on the six economic and social issues, the fight against COVID-19, the maintenance of social security, the protection of industrial and small-scale enterprises, and the smooth functioning of society are highlighted in the report. To ensure those targets are achieved, the premier said the government would have to purchase a large number of goods and services.
